2017 BROWNING MASTER CATALOG

2017 MASTER CATALOG

Long before Browning became a gun company, there was just the man. John Moses Browning grew up on what was then still considered the wild American West. Working in his father's frontier gun repair shop in Ogden, Utah since he could stand, John acquired a very common sense approach to gunsmithing. The shop repaired guns of all makes and styles, often from parts laying around the shop or from raw fabrication. As time wore on, John began looking beyond ways to simply repair guns and began to see how they could be made better. It was his desire to make a better gun that drove him throughout his life.

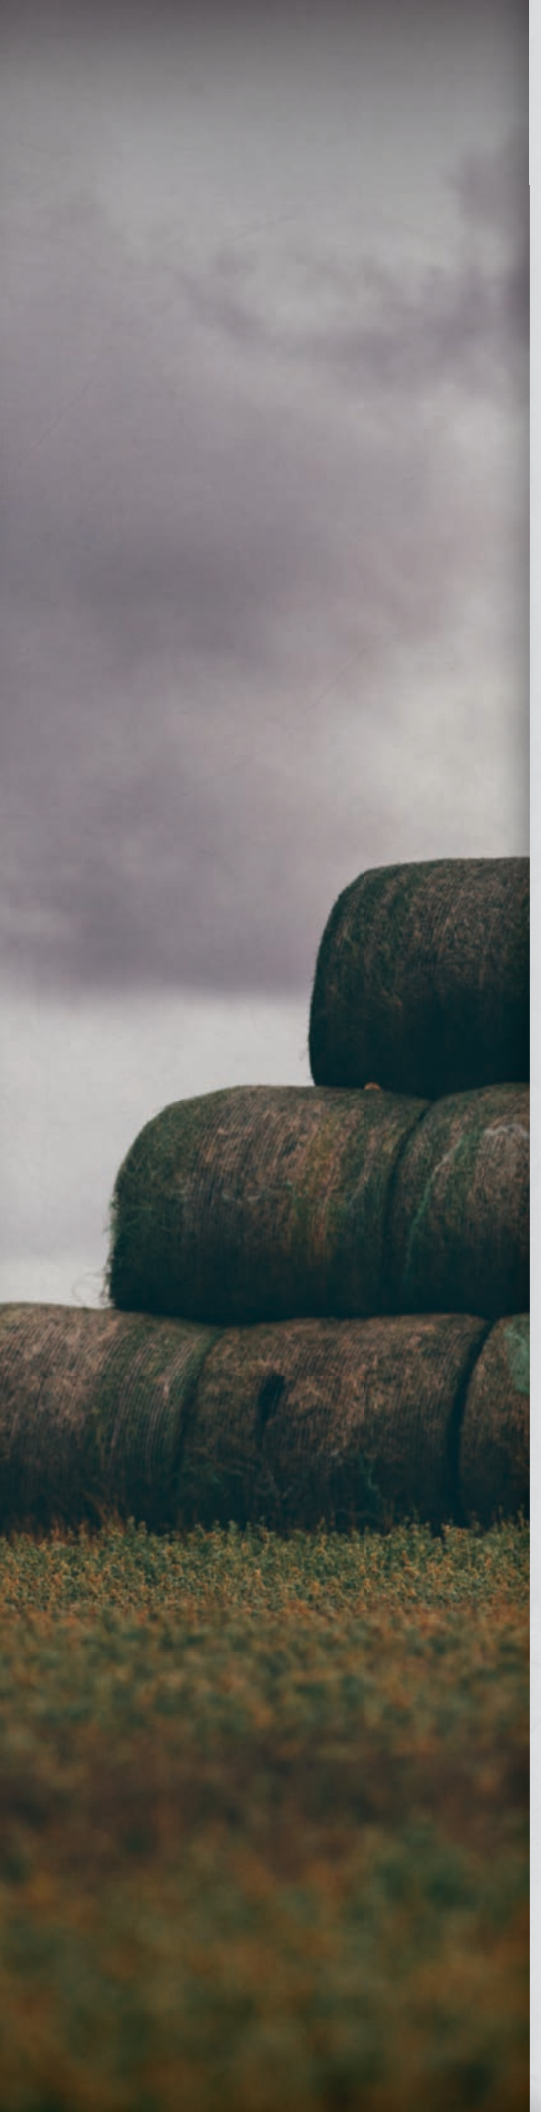

That same desire to develop and produce new and better products continues to drive us forward today. For 2017, we have improved many products in our broad lineup. You will find interesting new rifles, autoloading shotguns and more 1911-22 pistol variations than ever before. Security safes, knives and flashlights all see new models. Some people might wonder why change a good thing? That's just the way we do things here at Browning.

A TRADITION OF SHOTGUN EXCELLENCE.

For more than 100 years, Browning has been a leader in shotgun innovation. A peek into our history reveals scatterguns of all configurations: Side-by-sides, lever-actions, pumps, over and unders and, most notably, the first autoloader. While some of John Browning's shotgun inventions never saw life beyond his workshop, many of those that did have gone on to greatness in the hands of generations of hunters and target shooters.

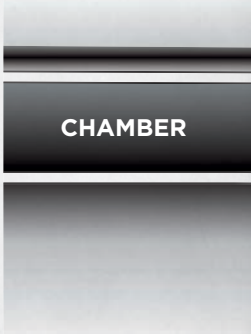

Whatever your pursuit, 2017 showcases a host of new Browning shotgun models to meet your needs.

SHOTGUNS

TOTAL BARREL DYNAMICS — FROM EXPERIMENTATION TO SCIENCE

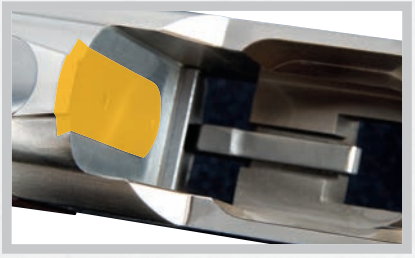

- Our engineers have fired literally millions of shells in order to improve the relationship between the shotgun barrel and shotshell. What began as experiments have become the science of shot pattern performance.
- Extensive testing has shown that shot is deformed as it passes through the restrictions of the forcing cone, a tight bore and the choke tube. When shot is deformed it is less stable in flight, leading to flyers and holes in patterns. Our Vector Pro lengthened forcing cone is designed to reduce stress on the shot column, and Back-Bored Technology allows the shot column to exit the barrel at maximum velocity. Our proven choke tube technologies further minimize the stress placed on the shot as it exits the barrel while constricting it to the pattern you need. Other manufacturers use shorter forcing cones that smash the shot, a bore that is under or over sized, or shorter choke tubes that result in inferior pattern performance.
- Total Barrel Dynamics — standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models — is a system of technologies that function together to reduce shot deformation and significantly improve pattern consistency and performance. Each component of Total Barrel Dynamics plays a part in keeping shot patterns whole and pellets on target. To ignore any single part of the system weakens performance.

FEATHER TECHNOLOGY

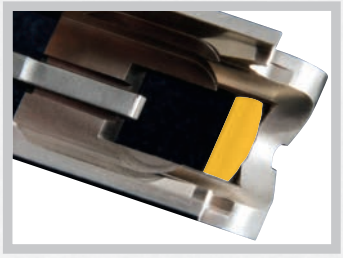

HEAVY DUTY, LIGHT WEIGHT

- Feather technology significantly reduces the weight of an over and under shotgun (about one pound) by using a high quality alloy for the receiver rather than steel.
- To maintain maximum durability, the breech face features a dovetailed steel insert.
- Citori models also use a full-width steel hinge pin and Cynergy shotguns feature steel MonoLock Hinge surfaces to resist wear.

STEEL BREECH FACE

All Feather models feature a steel breech face that resists wear, allowing the receiver to be built from weight-saving alloy.

CITORI STEEL HINGE PIN

The full-width, steel hinge pin in the Citori provides maximum strength and lasting endurance.

CYNERGY STEEL INSERTS

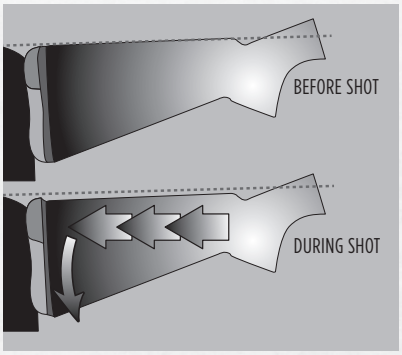

To ensure longevity, steel inserts are added to the MonoLock Hinge.

RECOIL REDUCTION TECHNOLOGIES

INFLEX TECHNOLOGY

INFLEX TECHNOLOGY RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

FOR SMALLER SHOOTERS

MICRO MIDAS AND MICRO FIREARMS

- Micro and Micro Midas firearms are specifically designed to give younger or smaller shooters a high quality, great fitting firearm.
- Micro and Micro Midas firearms are constructed with the same quality components and attention to detail as all Browning firearms.

BROWNING GROWTH INSURANCE PROGRAM

- Micro and Micro Midas models are eligible for the Growth Insurance Program that allows new owners to purchase a full-size stock at 50% off the retail price.
- Growth Insurance allows Micro and Micro Midas firearms to grow with the shooter.
- Offers you a higher rate of return on your firearm investment.
- Visit browning.com for complete details.

STOCK FINISHES

MAXIMUM GRIP

- Dura-Touch Armor Coating is extremely durable.
- Improves grip in wet and cold conditions.

DURA-TOUCH® Armor Coating

FLOATING RIB

MORE CONSISTENCY

- The floating rib allows the rib and barrel to expand at different rates to eliminate stress.
- Prevents changes to point of impact due to barrel heating and the rib staying cool.

TOTAL BARREL DYNAMICS

VECTORPRO™ BACK-BORED TECHNOLOGY INVECTOR-DS INVECTOR-Plus™

VECTOR PRO

LONGER IS BETTER. THE ADVANTAGES OF A LENGTHENED FORCING CONE

- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. The longer the forcing cone is, the more gradual the constriction.
- A gradual constriction reduces stress on the shot column as it passes into the bore, resulting in fewer deformed pellets. Less pellet deformation produces more uniform patterns and keeps more pellets in the central part of the pattern. Vector Pro is better than the competitors' forcing cone designs because of the more gradual constriction.
- Lengthening forcing cones is a popular and expensive aftermarket practice done to increase shot pattern performance. But it comes standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models.

STANDARD INVECTOR™

STANDARD INVECTOR

PATTERN VERSATILITY FOR 10 GA., 16 GA., 28 GA. AND .410 BORE SHOTGUNS

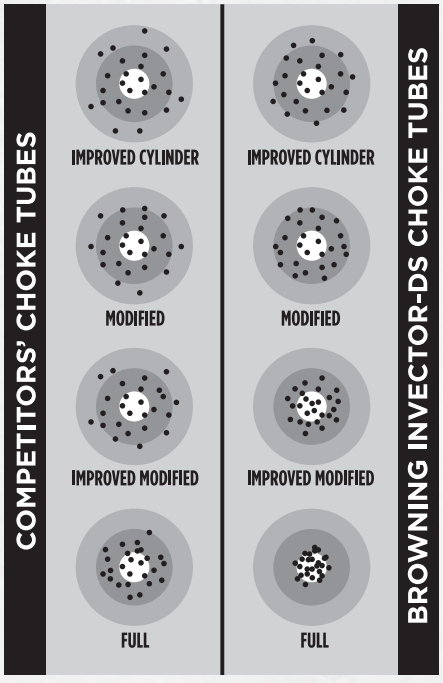

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the constriction needed for the shooting situation.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 191 through 194 for our complete line of choke tubes.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BACK-BORED TECHNOLOGY

WHAT IS BACK-BORING?

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity, minimize pellet deformity for more uniform patterns and reduce felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bore Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori, Cynergy, BPS and Silver models.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-DS

TAKING CHOKE TUBES TO THE MAX

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for faster swinging and improved balance.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The "DS" stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 191 and 193.

INVECTOR-PLUS

CHAMPIONSHIP PROVEN PERFORMANCE

- Invector-Plus started the long choke tube revolution. An ever-growing collection of championship medals is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed for the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- View the full line of Invector-Plus choke tubes on pages 191 through 194.

ROBBIE PURSER

With a list of victories a mile long, Robbie Purser is a legend on the skeet and sporting clays circuits. In addition to winning more than 200 tournaments during his career, he also holds a World Championship in skeet. Read more about Robbie on page 341.

THE BROWNING HIGH GRADE PROGRAM — YEAR FIVE.

Browning is no stranger to top notch trap guns, but we've never offered guns like these before. These new High Grade trap models match the legendary strength of generations of Browning over and unders to the lower profile receiver and mechanical triggers of the newer Citori 725. With style to match the performance, these two beautifully engraved and skillfully finished shotguns will be limited in production. Place your order today and enjoy one of these magnificent shotguns for years to come.

TOTAL BARREL DYNAMICS VECTORPRO INVECTOR-DS BACK-BORED TECHNOLOGY INFLEX TECHNOLOGY

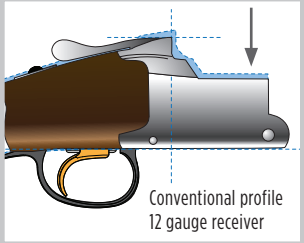

READY FOR COMPETITION.

You don't need to be a "pro" to appreciate the performance advantages of a Citori 725 Pro. Pro models offer maximum adjustability, allowing you to custom fit the shotgun to meet your exact needs. The proven design provides the strength for years of practice and competition.

TOTAL BARREL DYNAMICS · VECTORPRO · INVECTOR-DS · BACK-BORED TECHNOLOGY · INFLEX TECHNOLOGY · PRO FIT · PRO BALANCE

CITORI 725 PRO FEATURES AND BENEFITS

LOW PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the "one with the gun" feeling that makes the Citori 725 feel like an extension of your body.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability.

ABS CASE INCLUDED

- The sturdy, lockable ABS case is perfect for storage and transportation.

TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

PALM SWELL

- Aids in control.
- Optimizes finger-to-trigger placement.
- Provides a comfortable, secure grip.

PRO FIT ADJUSTABLE COMB

- The Browning Pro Fit Adjustable Comb makes it easy to find the perfect comb position.

- Pro Fit offers single bolt adjustment for both cast and drop. The revised design allows the stock to be professionally fit for shorter length of pull.
- Easy to read markings allow the shotgun to be dialed-in and easily replicated should the comb be removed.

PRO BALANCE SYSTEM

- The Pro Balance System allows you to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

- Stock weights reduce muzzle jump for more accurate follow-up shots and allow a smoother follow through.
- Pro Balance weights are easy to install.

PROVEN PERFECTION.

It's understood that you get more with a Browning Golden Clays model shotgun. More "ooohs," more "ahhhs," and certainly more compliments. In addition to the envious accolades that come from friends and competitors alike when they lay eyes upon this handsome over and under, the Citori 725 Sporting Golden Clays includes all the performance features that make the 725 great, resulting in more busted clays.

MORE WAYS TO BECOME ONE WITH THE GUN.

Low and sleek, the Citori 725 features a low-profile receiver that retains the features that make the legendary Citori so tough. You will also enjoy the benefits of improved recoil control, balance, swing and the crisp break of the excellent Fire Lite Mechanical Trigger. 2017 adds even more models to this impressive line.

725 CITORI

CITORI 725 FEATURES AND BENEFITS

TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

HIGH RIB

- Offers increased visibility — the barrels don't cover up the target.
- Improved cooling helps prevent heat waves from distorting visibility.

FLOATING RIB

- The floating rib allows the rib and barrel to expand at different rates to eliminate stress.
- Prevents changes to point of impact due to barrel heating and the rib staying cool.

FIRE LITE MECHANICAL TRIGGER

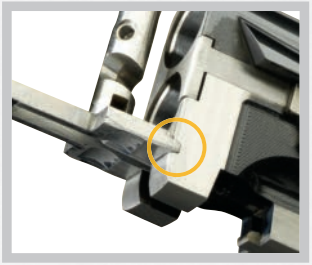

FIRE LITE MECHANICAL TRIGGER

- Exclusive mechanical trigger design.
- Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot; instead, it offers immediate second shot capability.
- Features less take-up, a crisp break and shorter overtravel.

ERGO BALANCED

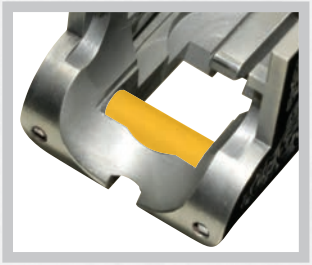

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes follow through.

TAPERED LOCKING BOLT

- Unlike other low-profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin just like other Citori models for maximum strength and longevity.
- The locking bolt engages a full-width tapered recess in the monoblock. Tapering the bolt and recess allows the bolt to seat deeper over time, accommodating for wear.

FULL-WIDTH HINGE PIN

The Citori 725's full-width hinge pin provides maximum strength and long-lasting endurance.

COMPETING TRUNNION DESIGN

The competitors' trunnions provide only a fraction of the bearing surface that the Citori 725's full-width hinge pin provides.

BECOME ONE WITH THE GUN

FOSTER AND MATT BARTHOLOW

Browning Pro Staff shooters and brothers Foster and Matt Bartholow, are a force to be reckoned with on the ATA trapshooting circuit. While competing in the Grand American World Trapshooting Championship, this dynamic duo combined to bring home 25 trophies with their Browning Citori shotguns. Read more about Foster and Matt on page 341.

BROWNING

A TRUE LEGEND.

Few firearms withstand the test of time like a Browning Citori. It has the perfect combination of performance and durability, and has excelled in fields and on ranges worldwide. Each Citori is assembled by hand, achieving component fit and durability rivaling guns costing hundreds or thousands of dollars more.

CITORI FEATURES AND BENEFITS

TRIPLE TRIGGER SYSTEM

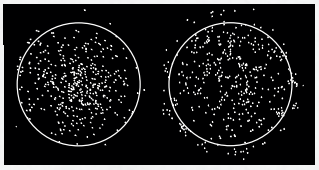

Citori target shotguns come equipped with the Triple Trigger System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

CHROME CHAMBERS

For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

TOTAL BARREL DYNAMICS

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil mainsprings. The convenient barrel selector allows you to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

VECTORPRO™

VECTOR PRO LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS

Browning was the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on shotguns. Longer, tapered Vector Pro forcing cone dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. Browning back-bore specifications represent the ideal bore dimensions. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance.

INVECTOR CHOKE TUBE SYSTEMS

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus (12, 20 gauge) interchangeable choke tube systems are featured on every Citori shotgun and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with back-bored barrels and Vector Pro lengthened forcing cones to produce dense patterns with uniform densities and fewer flyers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 191 to 195 for our complete line of choke tubes and wrenches.

BUILT TO LAST.

Generations of shotgunners have discovered that a Browning Citori wears in, not out. A perennial favorite, the Citori XT Trap has a well-earned reputation for lasting reliability. It is built with a full-width steel hinge pin (rather than a pair of trunnions) and a tapered locking lug designed to seat deeper with wear and keep the action locking up tight year after year.

CYNERGY FEATURES AND BENEFITS

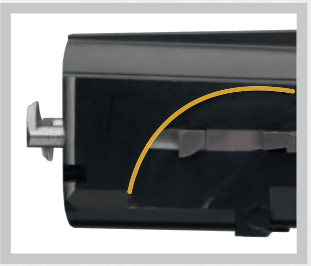

CYNERGY®

REVERSE STRIKER MECHANICAL TRIGGER

- The Reverse Striker is a striker-based, mechanical trigger system that does not use the inertia from recoil to set the hammers.
- Reverse Striker offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns.
- Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing.
- Cynergy target models are equipped with the Triple Trigger System, allowing finger-to-trigger length adjustment and the ability to switch between styles of trigger shoes: Wide checkered, narrow smooth or wide smooth canted.

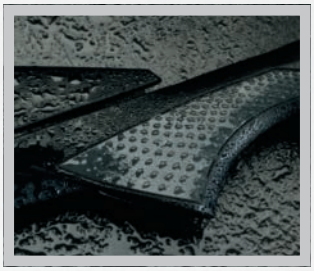

MONOLOCK HINGE

- The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver.
- Integrates the monobloc and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges.
- Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.

ADJUSTABLE COMB

- Composite models include an adjustable comb system that allows the fit of the gun to be customized.
- Drop at comb adjustments are made in 1/8" increments.
- For cast on/cast off customizing, we offer accessory combs that are shown below.

SUPERIOR GRIPPING SURFACES

- Composite Cynergy models feature molded-in rubberized gripping surfaces for a secure hold in every situation.

CHROME CHAMBERS

- Cynergy shotguns feature hard chrome-plated chambers.
- Increased durability and corrosion resistance.

IMPACT EJECTORS

- Impact Ejectors are aided by the punch of a secondary striker spring for positive, reliable ejection of fired hulls from the chambers.
- Unfired shells are elevated for easy removal.

CYNERGY ACCESSORIES

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BREAK THROUGH.

Even though you might shoot just a little trap, break a few sporting clays, and chase pheasants in the fall, a safe full of specialized over and under shotguns is more fantasy than reality. Rejoice. Your never-ending quest to find the one gun designed to perform in multiple disciplines is over. Cynergy CX models combine a 60/40 point of impact (POI) with a light, nimble feel to please the most demanding shooters, both on the range and in the field.

FEATHERWEIGHTS.

A pair of steel barrels can make carrying an over and under all day long a chore. With a lightweight alloy receiver, however, a Cynergy Feather is a pleasure. The noticeable lack of heft is most appreciated when a Cynergy Feather floats to the shoulder and is swung onto a flushing pheasant or grouse. Feather models feature steel components where it counts to ensure many seasons in the field.

Pheasants Forever's Rooster Road Trip

ANDREW VAVRA

ANTHONY HAUCK

Minnesota natives Andrew Vavra and Anthony Hauck are two members of the crew of *Rooster Road Trip*, an online and Facebook promotion for Pheasants Forever. Off the screen, both work for Pheasants Forever and Quail Forever with Andrew serving as the Marketing Manager and Anthony as the Director of Public Relations. Learn more about Rooster Road Trip and the rest of the team on page 335.

THE RIGHT TOOL FOR THE JOB.

The Browning BT-99 is built to do one thing — dust clays at the trap range. Shooters of every ability put their trust in the BT-99 because it has the features needed to help them excel, and the toughness to endure hours of shooting and thousands of shells year after year.

BT99

BT-99 FEATURES AND BENEFITS

FOREARM

- A beavertail forearm helps control recoil and assists hand-eye coordination.

RIB

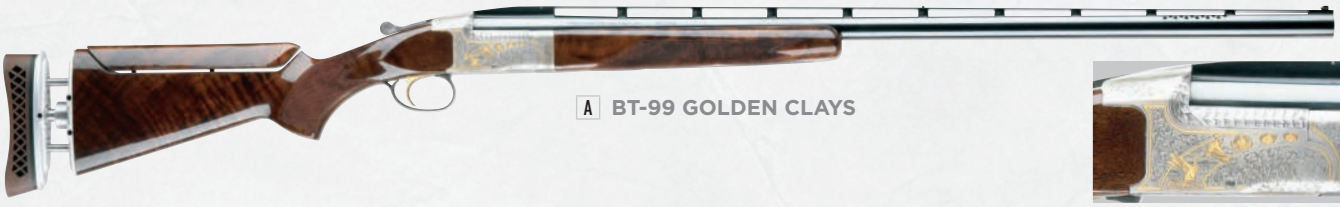

- High-post, 11/32" floating rib offers natural sighting and target acquisition.

CHROME CHAMBER

- The chrome-plated chamber resists wear and corrosion.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

FRED ZINK

Fred Zink is the man behind Zink Calls, a successful hunting DVD series and the popular TV program, *Avian-X.* This exciting show brings viewers along on waterfowl and turkey hunts across North America. Join Fred and his crew on the Pursuit Channel, Sportsman Channel and Wild TV. Read more about Fred on page 337.

WICKED LOOKS, WICKED PERFORMANCE.

Be it a lift kit and bigger tires on the truck, the color of paint on the house, or even a tattoo, most people like a little personalization to separate them from the rest of the pack. Why should a shotgun be any different? Now waterfowlers can choose between a pair of Browning autoloaders with custom touches to make them stand out — in a good way. Wicked Wing autoloaders feature a trick Cerakote Burnt Bronze camo finish on the receiver and Burnt Bronze on the barrel. The Briley® extended bolt handle and oversize bolt release make these controls easier to manipulate with gloves. A fully chromed bore adds corrosion resistance and longevity for year after year of shooting performance.

A A5 WICKED WING, MOSSY OAK SHADOW GRASS BLADES

RECEIVER Strong, lightweight aluminum alloy • Cerakote Burnt Bronze camo finish **BARREL** Lightweight profile • Flat, ventilated rib • Fully chromed bore for corrosion resistance • Cerakote Burnt Bronze finish **ACTION** 3" and 3-1/2" chamber models • Recoil-operated Kinematic Drive **STOCK** Composite with close radius pistol grip • Textured gripping surfaces • Shim adjustable for length of pull, cast and drop • Mossy Oak® Shadow Grass Blades camo finish • Dura-Touch Armor Coating • 1/4" and 1/2" stock spacers for length of pull adjustment **FEATURES** Vector Pro lengthened forcing cone • Three extended Invector-DS Banded choke tubes • Briley® extended bolt handle and oversize bolt release • Inflex recoil pad • Fiber-optic front sight • Ivory mid-bead sight • Includes ABS case **IDEAL USAGE** Hunting

BUILDING ON THE LEGEND.

The original Browning Auto-5 is considered to be nothing less than a legend in the hunting and shooting sports. Though the new A5 shares only the name and humpback receiver profile with John M. Browning's original autoloader, these new guns build on the legacy of reliability and performance earned by their namesake.

A5 FEATURES AND BENEFITS

ERGO BALANCED

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes smoother follow through.
- Places front hand closer to the bore line for superior hand eye coordination and pointability.

TURNKEY MAGAZINE PLUG

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using just a car key.

100,000 ROUND GUARANTEE
OR FIVE YEARS

HUMPBACK ACQUISITION ADVANTAGE

GET THE HUMPBACK ACQUISITION ADVANTAGE

- Extends the sight plane for faster, more natural sight alignment.
- Speeds target acquisition.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

SPEED LOAD PLUS

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

TOTAL BARREL DYNAMICS · VECTORPRO · INVECTOR-DS · KINEMATIC DRIVE · INCLUDES ABS CASE · INFLEX TECHNOLOGY

KINEMATIC DRIVE

KINEMATIC DRIVE SYSTEM

- Kinetic energy is defined as the energy of motion.
- The A5 uses kinetic energy to power the recoil-operated Kinematic Drive System.
- Simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime.
- Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000-round or five-year guarantee — come hell or high water.
- Clean operation because gases are sent out the barrel and away from the action.
- Extreme load versatility for reliable performance with virtually all loads down to one ounce field with no adjustments.

ERGONOMIC BOLT LATCH

- Conveniently located just ahead of the trigger guard.
- Locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading.
- Oversized shape makes the bolt latch easy to locate and operate with or without gloves.

ABS CASE INCLUDED

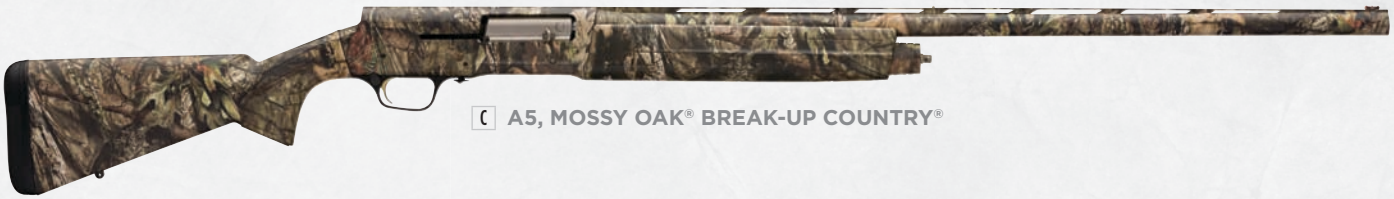

- Sturdy, lockable ABS case is perfect for storing and transporting the A5.

BROWNING

TOMMY THACKER

Tommy Thacker is ranked among the best 3-Gun competitors in the USA. With back-to-back championships in the 3-Gun Nation Pro Series in 2011 and 2012, Tommy has his pick of autoloading shotguns from any manufacturer. He chooses the Browning A5. Read more about Tommy on page 342.

MAXUS

A MAXUS ULTIMATE

TOTAL BARREL DYNAMICS · VECTORPRO · INVECTOR-PLUS · BACK-BORED TECHNOLOGY · POWER DRIVE GAS SYSTEM · INCLUDES ABS CASE · INFLEX TECHNOLOGY · MOSSY OAK

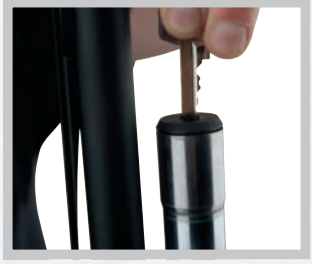

MAXUS FEATURES AND BENEFITS.

POWER DRIVE GAS SYSTEM

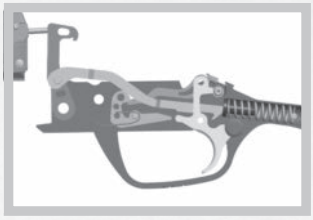

- Extensive research has produced the most reliable gas piston design ever.
- The gas piston features oversized exhaust ports that dump gases faster with heavy loads to reduce recoil.
- 20% longer piston stroke travel increases reliability with light loads.
- An enclosed seal keeps residue out of the action for cleaner operation.

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a standard car key.

LIGHTNING TRIGGER

- The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun.
- Offers a smooth, crisp feel with minimal travel.
- Lock times average .0052 seconds, 24% faster than the nearest competing autoloader.
- Easy to remove for cleaning.

SPEED LOCK FOREARM

- The patented Speed Lock Forearm replaces the traditional screw-on magazine cap.
- Makes taking down the Maxus for cleaning or storage fast.
- Makes attaching or removing the sling a snap.

MAGAZINE CUT-OFF

- The magazine cut-off (not available on Sporting models) allows the chamber to be unloaded to change loads without cycling a shell from the magazine.
- Useful when hunting different bird species and different loads are instantly required.

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

OPTIMAL DIMENSIONS

- The Maxus features a trim forearm and close radius pistol grip to maximize control.
- An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.
- Drop and cast can be tuned using the included stock shim kit.
- A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

LESS MUZZLE JUMP

- The Power Drive Gas System works with the Inflex Technology recoil pad.
- Reduces muzzle jump up to 44% compared to the competition.

LOCKTIME COMPARISON

- The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to the shoulder than other autoloaders.

THE SOFTEST SHOOTING AUTOLOADER EVER

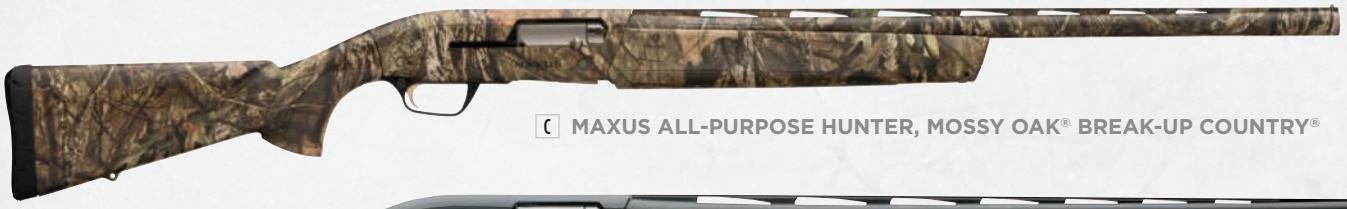

- Felt recoil is more than an instantaneous peak force; it is the total energy absorbing experience felt when a shell is fired.
- The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to the shoulder than other autoloaders on the market.

MAXIMUM SHOOTING PERFORMANCE.

The Browning Maxus was designed first and foremost to provide maximum reliability whether hunkered down in a duck blind or swinging the muzzle through a day of sporting clays. But why stop there? The Power Drive Gas System also reduces recoil even with heavy loads and cycles with blinding speed to provide the comfort and confidence to help you shoot your best.

Bob St. Pierre is part of the crew of *Rooster Road Trip*, an online and Facebook promotion for Pheasants Forever. When he's not on the road, Bob is also a well-known radio personality, blogger and spends his non-hunting hours as the Vice President of Marketing at Pheasants Forever and Quail Forever. Learn more about *Rooster Road Trip* and the rest of the team on page 335.

SAME PERFORMANCE AND A GREAT NEW LOOK.

Speed, handling, pointability and reliability are Browning hallmarks. For 2017, these reworked Silver shotguns include all of those essential features in a sharp looking new package.

NEW 2017

B SILVER MATTE HUNTER

NEW 2017

C SILVER MATTE HUNTER MICRO MIDAS

SILVER FEATURES AND BENEFITS

ACTIVE VALVE system

LESS RECOIL WITH THE ACTIVE VALVE

- The self-adjusting Active Valve gas system in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil.
- When shooting light loads, most of the gases operate the action.
- With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.
- Superior recoil reduction from the Active Valve means faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads being fired.

MAXIMUM GRIP

- Composite Silver models combine checkered gripping surfaces and proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TRIGGER

- The trigger assembly can be removed in just seconds for a thorough cleaning.
- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

A SILVER BLACK LIGHTNING

A SILVER BLACK LIGHTNING

RECEIVER Strong, lightweight aluminum alloy • Semi-humpback design • Gloss black finish **BARREL** Lightweight profile • Ventilated rib • Gloss blued finish **ACTION** Gas-operated autoloader • 3" chamber • Active Valve System reliably cycles a wide range of loads **STOCK** Lightning-style, gloss finish Grade 2.5 Turkish walnut **FEATURES** Three Invector-Plus choke tubes • Brass front bead sight **IDEAL USAGE** Hunting/Sporting Clays

ACTIVE VALVE system · BACK-BORED TECHNOLOGY · INVECTOR-Plus

LOAD VERSATILITY

- The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads.
- 12 gauge 3" models fire everything from light, 1 oz., 2-3/4" field loads to the heaviest 3" magnums. The 3-1/2" version is built to handle a similar range, from 1-1/8 oz., 2-3/4" field loads up to hard-hitting 3-1/2" magnum loads.

Light Load (1 oz.)

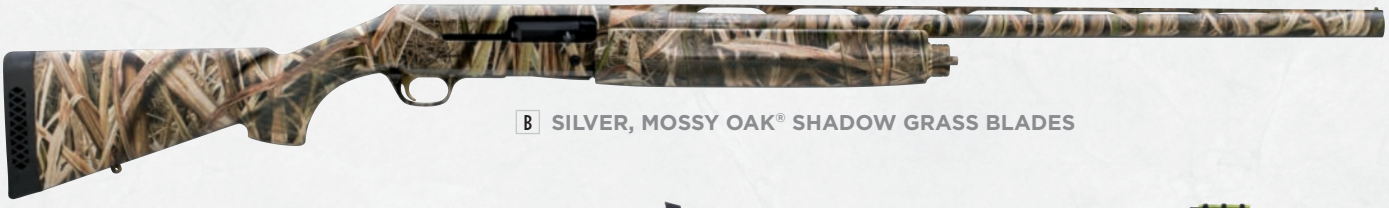

Heavy Load (2 oz.)

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

VALUE ADDED VERSATILITY.

Thanks to potent improvements in ammunition, hunting deer, bear or wild boar with a shotgun is increasing in popularity. There is also an added benefit with a Browning shotgun — accessory barrels are available to easily convert that same shotgun into a wingshooter. The cantilever scope mount ensures the scope is still on target when it's time to swap back for deer season.

ACTIVE VALVE system DURA-TOUCH® Armor Coating MOSSY OAK

A LIFETIME OF PUMP-ACTION PERFORMANCE.

Crafted from long-lasting steel and painstakingly assembled, the Browning BPS is the highest quality pump-action shotgun produced. The heft of the BPS helps offset recoil and a pair of steel action bars inspire confidence and control.

BPS FEATURES AND BENEFITS

BOTTOM EJECTION AND LOADING

- Unique bottom ejection throws empty hulls straight down, out of the line of sight.
- The BPS is the best pump shotgun choice for both right- and left-handed shooters.

MAGAZINE CAPACITY

- 2-3/4": Four in the magazine, one in the chamber.
  3": Three in the magazine, one in the chamber.
  3-1/2": Three in the magazine, one in the chamber.
- A three-shot magazine adaptor plug is included.

RELIABLE PUMP-ACTION

- The proven pump-action features rugged steel components.
- The receiver is machined from a solid block of forged steel.
- Rigid double action bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient slide-action operation.
- Reliable in all conditions.
- A convenient serrated slide release is located at the rear of the trigger guard.

MAXIMUM GRIP

- Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TANG SAFETY

- The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloves on.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

GAME ON.

A shotgun as versatile and reliable as the BPS should be used for more than just wingshooting. Simply add an extra barrel and the durable pump-action BPS becomes the perfect shotgun for every type of hunting and shooting sport, from dropping wild boar and deer, to dusting clays, to bagging ducks.

RIFLES

CONFIDENCE GOES A LONG WAY.

Successful rifle shooters have one thing in common — confidence. Confidence in their abilities, optics, equipment and, most importantly, their rifle.

Browning has been in the rifle business for more than 130 years. John M. Browning developed his first firearm, the Single Shot Rifle, back in 1878. The design of this robust rifle was later purchased by Winchester and became the legendary Model 1885. Mr. Browning's sole purpose for building the Single Shot Rifle was to have a gun in which he had complete confidence.

From that humble first rifle, generations of hunters and shooters have benefitted from the confidence of having the name Browning engraved on the barrel of their rifle.

RALPH AND VICKI CIANCIARULO

Ralph and Vicki Cianciarulo have been in the hunting TV business longer than most; considered to be pioneers in the industry as one of the first hunting couples on air. Join "The First Couple of Hunting TV" on the Outdoor Channel on both of their programs: *The Choice* and *Archer's Choice*. Learn more about Ralph and Vicki on page 338.

HELL'S CANYON

BEYOND THE HUNT

RICK AND JULIE KREUTER

The husband and wife hunting team of Rick and Julie Kreuter host *Beyond the Hunt*. This unique program brings you along with Rick and Julie on their hunting adventures, while placing an emphasis on wildlife conservation and land management. Watch *Beyond the Hunt* on the Outdoor Channel and learn more about Rick and Julie on page 340.

CONFIDENCE.

Hell's Canyon Speed edition rifles include all of the great features that make the X-Bolt a Total Accuracy package, while adding custom touches like a tough Cerakote™ finish and A-TACS AU Camo® for added concealment. Like all X-Bolt rifles, these guns are lightweight and nimble, making them ideal mountain rifles. Looking for an accurate rifle that stands out from the crowd? Head for Hell's Canyon.

Outdoor Life Editor's Choice Centerfire Rifle of 2016.

EDITOR'S CHOICE
CENTERFIRE RIFLES

X-BOLT FEATURES AND BENEFITS

FEATHERTRIGGER™

FEATHER TRIGGER

- For precise shooting there is absolutely no substitute for a crisp, predictable trigger.
- The X-Bolt's three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep and minimal overtravel.
- The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3-1/2 to 4 lbs.
- An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

X-LOCK SCOPE MOUNTING SYSTEM

- Securely mounted optics are essential for accuracy and precision on any rifle.
- X-Lock mounts feature a four screws per base design that replaces the traditional two screw system.
- Offers more accurate placement and more secure attachment to the receiver.

FREE-FLOATING BARREL

- Every X-Bolt action is individually bedded into the stock for a true free-floating barrel, not bedded using a master receiver like the competition.
- The barrel is free-floated by bedding the front and rear of the action to maintain barrel to stock spacing and consistent accuracy.
- The recessed muzzle crown helps protect the rifling from damage.
- Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

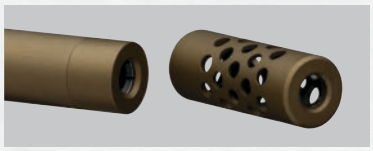

BOLT UNLOCK BUTTON

- The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber.
- Located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

Cerakote Burnt Bronze Finish

Barrel Fluting

Muzzle Brake and Thread Protector

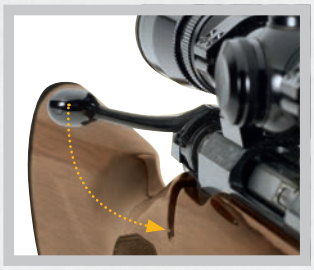

A X-BOLT HELL'S CANYON LONG RANGE

X-LOCK™ FEATHERTRIGGER™ INFLEX TECHNOLOGY WSM DURA-TOUCH® Armor Coating A-TACS CAMO™ ADVANCED TACTICAL CONCEALMENT SYSTEM

60° BOLT LIFT

- Short 60˚ bolt lift is fast cycling and the hand easily clears the scope.
- The bolt is machined from solid steel bar stock for strength and custom rifle precision.
- Three locking lugs provide exceptional bolt strength.

ROTARY MAGAZINE

- The unique rotary magazine is removable, durable, easy to load and feeds rounds from the center line, not off to the side like other rifles, for straight to the chamber feeds.
- Unique design holds U.S. patent numbers: 8,156,675; 8,484,875 and 8,745,912

TANG SAFETY

- Tang safety is easy to reach with the thumb.

PERSONALIZED ENGRAVING

- The bolt can be personalized with your name. Call (800) 333-3288.

TOUGH RIFLES FOR ROUGH COUNTRY.

X-Bolt Stalker rifles are built to excel. The lightweight composite stock is trim and contoured to feel great in the hands and shoulder with ease. Expertly bedded into the stock, the sleek action and floated barrel ensure x-ring accuracy. With a variety of calibers to select from, there is sure to be an X-Bolt Stalker just right for the game you are chasing.

X-LOCK™ FEATHERTRIGGER™ INFLEX TECHNOLOGY DURA-TOUCH® Armor Coating WSM

IT'S A BROWNING.

There will always be hunters who prefer the touch of solid walnut. For decades, Browning guns have been appreciated for the fine fit of their richly finished stocks. Like their composite counterparts, X-Bolt models with wood stocks feature a free-floated barrel and are bedded at the recoil lug and rear action screw to help ensure consistent accuracy.

ALASKA OUTDOORS TV

CHAD GLAUSER

A Utah native, Chad Glauser knew that real adventure was to be had in Alaska. *Alaska Outdoors Television* chronicles his adventures as he hunts, cooks and shares the tips and tricks of hunting the Last Frontier. Read more about Chad on page 335.

A VALUE BULLSEYE.

The straight-shooting AB3 rifle includes all of the features necessary to provide excellent accuracy without breaking your wallet. Importantly, it retains the longevity and trusted reliability appreciated by generations of Browning enthusiasts.

AB3 FEATURES AND BENEFITS

LARGE BOLT SURFACE

- The robust bolt offers additional rigidity.
- The bolt is machined from solid steel bar stock and machined internally to keep weight low.
- Three locking lugs provide exceptional bolt strength.
- Super smooth chrome bolt finish is great looking, quieter and offers smooth cycling.

DETACHABLE MAGAZINE

- Polymer and steel construction is lightweight and extra tough.
- Unique spring and follower design minimizes follower tilt for more reliable feeding.

INFLEX RECOIL PAD

- Inflex recoil pad softens recoil and allows faster, more accurate second shots.
- Internal structure is designed to pull the rifle down and away from the face to reduce felt recoil.

FREE-FLOATING BARREL

- Free-floating maintains barrel to stock spacing for consistent accuracy.
- Recessed muzzle crown helps protect the rifling from damage.
- Precision button-rifled barrel is triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

BOLT LOCK OVERRIDE BUTTON

- The bolt lock override button provides an additional margin of safety when checking and unloading the chamber.
- Located behind the bolt handle, the bolt lock override allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and sear.

60° BOLT LIFT

- Short 60˚ bolt lift is fast cycling and the hand easily clears the scope.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

KRISTY LEE COOK

JESS HULL

JESSI JO STANFILL

Join singer, songwriter and hunter Kristy Lee Cook, and her friends Jess Hull and Jessi Jo Stanfill as they travel across the country finding adventures at every turn. The *Most Wanted List* airs on the Sportsman Channel. Learn more about the ladies and their show in the bio on page 339.

WORK IT.

The BLR is more than nostalgic. Like other lever-action rifles, the BLR carries the traits of quick handling, fast cycling and sure shooting, but that is where the similarities end. The Browning BLR features a detachable box magazine that feeds superior, pointed bullets in modern calibers for accuracy that competes with many bolt-action rifles plus cycling speed they can't touch.

BLR FEATURES AND BENEFITS

RECEIVER

- Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

ACTION

- Lightning fast, glass-smooth rack and pinion lever-action.
- Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

HAMMER

- The folding hammer provides an added measure of safety when the hammer is at half-cock.
- The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen; and four basic positions: Full-cock, half-cock, folded hammer position and the dropped, or fired position.

TAKEDOWN FEATURES

- BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store.
- The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

A BLR LIGHTWEIGHT '81 STAINLESS TAKEDOWN

RECEIVER Aircraft-grade alloy • Satin nickel finish • Drilled and tapped for scope mounts **BARREL** Matte stainless steel finish • Crowned muzzle • Adjustable sights • Drilled and tapped for scout scope mount (not included, see page 187) **ACTION** Lever-action • Rotating bolt • Detachable box magazine **STOCK** Satin finish gray laminate wood • Checkered straight grip **FEATURES** Recoil pad • Separates for storage or transportation • Optional scout-style scope mount • TRUGLO®/Marble Arms® fiber-optic front sight

BOUNDLESS HUNTING

WILLIAM AND MCLEAN RUSSELL

Join brothers William and McLean Russell as they travel around the globe pursuing game on their program *Boundless Hunting*. Learn more about the brothers and their show in the bio on page 337.

100 YEARS OF THE BAR.

Commissioned by the U.S. Army, John M. Browning designed the original Browning Automatic Rifle in a mere three months. Variants of this legendary military arm served with distinction from World War I until the Vietnam War. But the legacy of the BAR didn't end there. The concept of a sporting BAR rifle was the brainchild of another Browning, John's grandson Bruce. With aid from the firearm experts of FN in Belgium, the sporting BAR was born. To commemorate 100 years of the Browning BAR, every rifle produced in 2017 will receive a limited edition serial number. The anniversary model (shown) is presented in the timeless Safari Grade. Exquisite wood and embellishments set this very limited rifle apart.

NEW 2017

B BAR MK 3

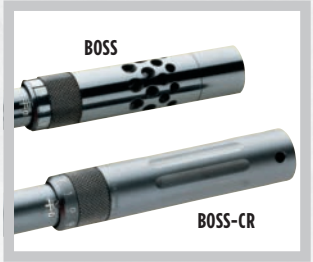

BAR FEATURES AND BENEFITS

ACTION

- The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel.
- The seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads.
- The strong and rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration.
- The buffering system reduces wear and stress on the rifle's mechanism.

THE BOSS DEVICE

- The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy.
- The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the BAR Mark II Safari.

MAGAZINE

- Detachable box magazine with a unique hinged floorplate allows the shooter to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

RECEIVER

- The BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.
- The BAR MK 3 is built on an aircraft-grade aluminum alloy receiver.
- All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

MAGNUM PUNCH FOR EVERY GAME.

The BAR MK 3 honorably holds its place in the hands of hunters and shooters around the globe. There is simply not another sporting autoloader produced with the combination of timeless style, gas-operated reliability and magnum knockdown punch afforded by this legendary rifle.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold, Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

DIFFERENT IS GREAT.

The straight-pull bolt-action design of the Browning T-Bolt cycles fast, locks up tight for excellent accuracy and is easy to operate, making it ideal for every shooter. Lightweight and fun to shoot, T-Bolt rifles are made to the highest standards of Browning quality.

T-BOLT FEATURES AND BENEFITS

STOCK

- Stocks are full-size to more comfortably fit adults.
- Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock.
- Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench.
- All models include a bedded action and dual action screws for solid attachment.
- Sling swivel studs included.

TRIGGER

- The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel.
- Adjustable for pull weight.

BUTTSTOCK MAGAZINE STORAGE

- Composite stock models offer a convenient location to securely store an extra magazine.

ACTION

- Receiver is machined from steel barstock.
- Features crossbolt lockup for strength and smooth operation.
- The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band.
- Right-side ejection on both right- and left-hand models.

SAFETY

- Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

- Target/Varmint models feature a 22" medium target profile.
- T-Bolt Sporter models feature a 22" medium sporter profile.
- Barrel is free-floating with a semi-match chamber and target muzzle crown.

OPTICS READY

- Receiver is drilled and tapped for scope mounts (not included). See pages 186-187 for scope rings and bases for T-Bolt rifles.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

22 Long Rifle

17 HMR / 22 WMR

DOUBLE HELIX MAGAZINES

- 10-round capacity.
- The patented Double Helix rotary box magazine uses torsion spring driven interlocking gears for added reliability and easy loading and unloading.

A LEVER YOU WON'T LET GO.

Browning BL-22 rimfire rifles still place solid build quality as first priority, and handling one will remind you of when manufacturing a "22" meant more than it does to other gun makers today. The quick-throw lever action makes shooting quick and accurate for performance that generations of shooters will enjoy.

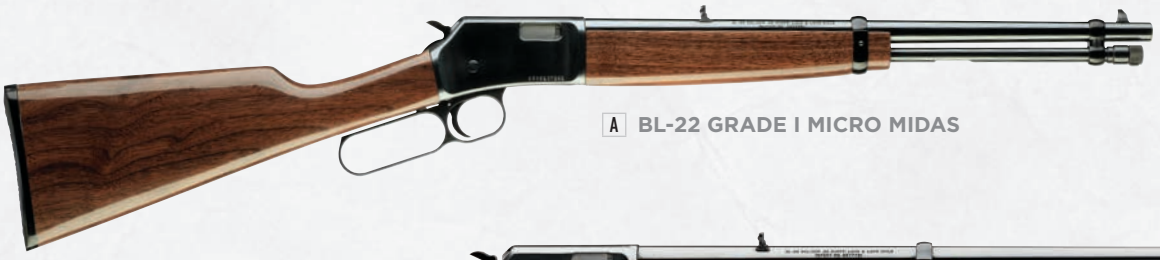

BL-22 FEATURES AND BENEFITS

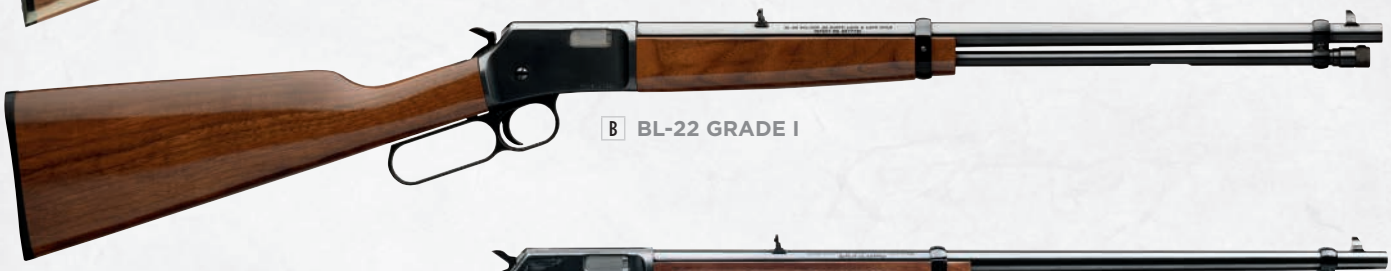

RIMFIRE THOROUGHBREDS.

- The slick, lever-action BL-22 is perfect for new and seasoned shooters alike.
- Quick-cycling 33° lever throw.
- The trigger travels with the lever to prevent finger pinch.
- High-quality construction.
- Fires .22 Short, Long and Long Rifle ammunition.
- Short lever throw is ideal for smaller hands.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

ORIGINAL INGENUITY.

The SA-22 is one of John M. Browning's most time-honored designs. These compact, lightweight rifles take down for storage and are a perfect reminder of the talents of the greatest gun designer in history.

SA-22 FEATURES AND BENEFITS

TAKEDOWN FEATURE

- The Semi-Auto 22 can be quickly taken down to a compact length of only 19-3/8" for storage or packing.

BARREL ADJUSTMENT

- The knurled knob allows play to be adjusted out of the barrel to ensure accuracy.

BOTTOM EJECTION

- Bottom ejection makes the Semi-Auto 22 ideal for right- or left-handed shooters alike.

IN-STOCK MAGAZINE

- The magazine is located in the stock to maintain the trim dimensions of the rifle.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

RIGHT ON TARGET.

Lightweight, compact and nimble, the Buck Mark Rifle is the ideal choice for plinking or hunting small game. These little guns are easy to operate and tremendously fun for shooters of all ages.

BUCK MARK RIFLES FEATURES AND BENEFITS

SAFETY AND SLIDE RELEASE

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

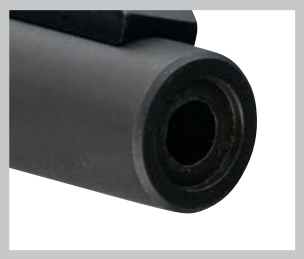

SIGHTS

- Sporter model features a TRUGLO®/Marble Arms® fiber-optic sight system.
- The rear sight is adjustable for windage and elevation.

FRAME

- Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

BARREL

- Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a bull barrel.
- The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

MAGAZINE RELEASE

- Located adjacent to the trigger guard for convenient operation.

SLIDE

- Serrated for an improved cocking grip.

BLACK LABEL
380 AUTO

AN ORIGINAL INNOVATOR OF HANDGUNS.

John M. Browning is responsible for many of the most important handgun innovations in history. His Model 1911 is widely regarded as the most outstanding pistol design of all time, and he laid the groundwork for the “Grand Browning,” the pistol that would later be known as the Hi Power. He also developed several benchmark pistol cartridges including the 45 ACP, 380 ACP and 25 ACP.

Today, you will still find versions of the 1911 and Hi Power among our pistol offerings. This speaks volumes not just to the designs themselves, but to the visionary man who developed them.

HANDGUNS

X-RING PERFORMANCE.

The Buck Mark is ready to deliver top-notch performance in formal competition or just a day plinking at the range. Made in the USA on a machined aluminum frame, the Buck Mark features a precision-rifled barrel, crisp trigger and adjustable sights. Shoot a Buck Mark and own the 10-ring.

BUCK MARK PISTOLS FEATURES AND BENEFITS

EASY TO REACH CONTROLS

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.
- The magazine release is positioned adjacent to the trigger guard for convenient operation.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

ABS CARRY CASE

- Buck Mark pistols are shipped in a sturdy ABS case or padded pistol rug.

FRAME

- Machined from aircraft grade aluminum alloy.

BARREL

- Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve.
- The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

SIGHTS

- The 16-click per revolution adjustable Pro-Target™ sight is standard on all models.
- This sight provides a finer degree of adjustment over the industry's standard of 12-clicks per revolution.
- Fiber-optic TRUGLO®/Marble Arms® front sights are available on select models.

GRIPS

- Several wood, laminate and composite styles are available. Overmolded Ultragrip FX (UFX), soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

PUT THE FUN IN FUNCTION.

Scaled down to 85% of the size of the original 45 ACP models, the 1911-22 is an excellent handgun for plinking, hunting and target shooting. Weighing less than half as much as its full-size counterparts, the 1911-22 can comfortably be fired by hands of every size.

1911 22

1911-22 FEATURES AND BENEFITS

SAFETY

- Large manual thumb safety and grip safety.

SLIDE

- Vertical serrations provide an improved cocking grip.
- The convenient manual slide release is easily operated with the shooting or support hand.

FRAME

- Aircraft grade aluminum alloy or engineering grade composite.
- Walnut grip panels on select models.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

MAGAZINE RELEASE

- Positioned adjacent to the trigger guard for convenient operation.

ABS CARRY CASE

- 1911-22 pistols are shipped in a sturdy ABS case.

JARED WIHONGI

Jared Wihongi has been instrumental in the development of the Black Label knife line. He is a specialist in edged weapons and has more than 25 years of international martial arts experience. As an instructor, Jared is highly sought after and has worked with special operations forces and counterterrorism groups around the globe. Learn more about him on page 344.

BLACK LABEL BEAUTIES.

Black Label Model 1911-22s feature a list of exciting upgrades that improve the functionality and shootability of these handguns. Accurate and reliable, the lightweight 1911-22 is surprisingly comfortable in hands of every size.

1911 22

BLACK LABEL 1911-22 FEATURES AND BENEFITS

EXTENDED AMBIDEXTROUS SAFETY

- Ambidextrous thumb safety is easy to operate for both right- and left-handed shooters.
- Extended design is easier to reach with the strong hand and ensures secure thumb engagement.

ABS CARRY CASE

- Black Label 1911-22 pistols are shipped in a sturdy ABS case.

BEAVERTAIL GRIP SAFETY

- The beavertail design prevents the hand from being pinched between the grip safety and the hammer.
- Raised bump ensures positive operation.

FLAT MAINSPRING HOUSING

- Makes the grip more comfortable for a wider range of shooters.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

FRAME

- Engineering grade composite.
- Laminated grip panels.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

COMBAT-STYLE SIGHTS

- Combat-style sights offer rapid target acquisition.

STEEL 3-DOT SIGHTS

- Sturdy steel construction.
- Three-dot style for easy alignment.

FIBER-OPTIC SIGHTS

- Speeds target acquisition.
- Sturdy steel construction.
- Three-dot style for easy alignment.
- Adjusts brightness based on surrounding light.

THE RIGHT 380.

Though a mere 85% scale of the original 45 ACP versions, the single-action 1911-380 operates in the same manner as the larger models. A precision-built composite frame with integrated steel slide rails also includes extras like extended controls for easier operation. Comfortable to shoot with light recoil, the 1911-380 is ideal for new shooters, sport shooting and personal protection. The 1911-380 is proudly made in the USA.

1911 380

BLACK LABEL 1911-380 FEATURES AND BENEFITS

EXTENDED AMBIDEXTROUS SAFETY

- Ambidextrous thumb safety is easy to operate.
- Extended design is easier to reach with the strong hand.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- 8-round capacity.
- Reliably feeds all types of factory ammunition.

BEAVERTAIL GRIP SAFETY

- The beavertail design prevents bite to the hand from the grip safety.
- Raised bump ensures positive operation.

FLAT MAINSPRING HOUSING

- Makes the grip more comfortable for a wider range of shooters.

FRAME

- Engineering grade composite.
- Composite grip panels.

ABS CARRY CASE

- The Black Label 1911-380 pistol is shipped in a sturdy ABS case.

STRAIGHT FROM THE MASTER.

The Model 1911 design and the 380 ACP cartridge are both inventions of legendary gun designer John M. Browning. The 1911-380 perfectly complements the 380 ACP cartridge because the pistol is slightly larger than its subcompact competition and better able to accommodate the spirited caliber for more manageable recoil and excellent accuracy.

HI POWER

PISTOL PERFECTION.

Though frame materials and advances in technology have allowed handguns to evolve, many still borrow elements from the classic Browning Hi Power. Dialed-in ergonomics and the sure heft of a steel frame make the Hi Power one of the most shootable firearms available.

HI POWER FEATURES AND BENEFITS

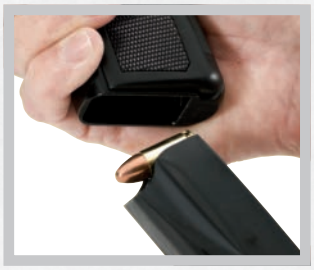

FRAME AND SLIDE

- The frame and slide are built from solid steel to keep recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in the hand is impeccable.

SIGHTS

- Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

MAGAZINE CAPACITY

- Double-stack magazine design.
- 13-round magazine capacity. 10-round capacity where required by law. Follow state and local laws regarding magazine capacity.
- Two magazines are included.

SAFETY

- A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

HERSTAL BELGIUM 18 78
JOHN M. BROWNING
COLLECTION

John M. Browning

Born in 1855, John M. Browning dedicated his life to creating firearms of exceptional quality and revolutionary construction.

It is Belgium, however, that is home to his most lasting legacy: The B25.

First manufactured by Fabrique Nationale d'Herstal in 1925, the B25 was the world's first successful over and under shotgun. It was the result of Browning's creative genius and experience combined with more than 400 years of manufacturing expertise.

Often copied, the B25 has never been equalled, and remains an icon for shooting experts everywhere.

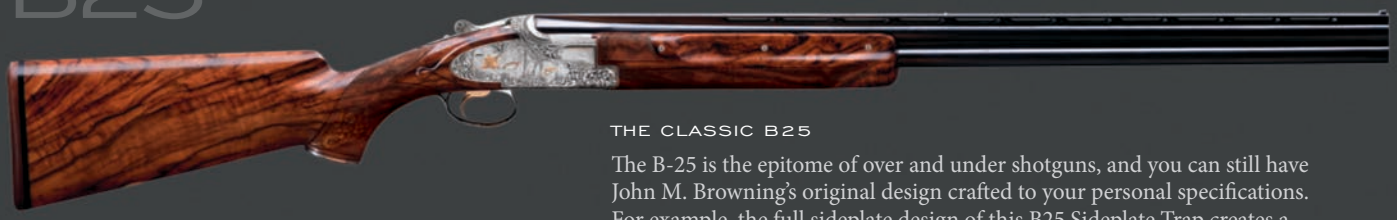

John M. Browning was a tireless innovator and a legend in the truest sense; so it's befitting that his name should grace a range of exquisitely crafted hunting and sporting guns.

The John M. Browning Collection is the very best of what we do.

Please contact your Browning Dealer for complete ordering information.

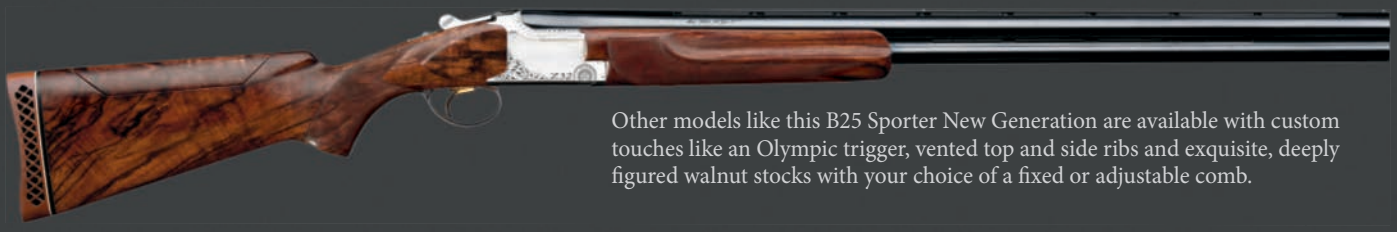

THE BEST THERE IS

B25

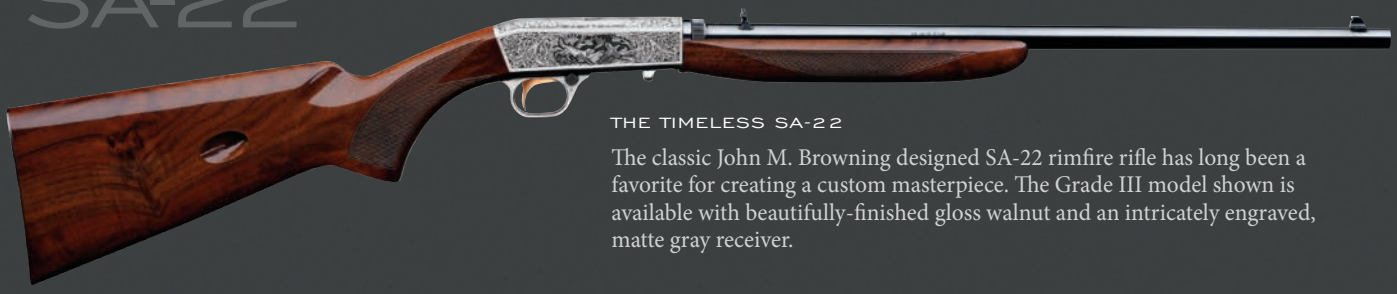

THE CLASSIC B25

The B-25 is the epitome of over and under shotguns, and you can still have John M. Browning's original design crafted to your personal specifications. For example, the full sideplate design of this B25 Sideplate Trap creates a stunning canvas for traditional engraving and precious metal inlays.

Other models like this B25 Sporter New Generation are available with custom touches like an Olympic trigger, vented top and side ribs and exquisite, deeply figured walnut stocks with your choice of a fixed or adjustable comb.

SA-22

THE TIMELESS SA-22

The classic John M. Browning designed SA-22 rimfire rifle has long been a favorite for creating a custom masterpiece. The Grade III model shown is available with beautifully-finished gloss walnut and an intricately engraved, matte gray receiver.

HI POWER

John M. Browning's Hi Power is a timeless classic and is widely considered to be his finest handgun design. It naturally becomes the pistol of choice for anyone wanting to showcase the unmatched skill and craftsmanship of our artisans in their personal firearm collection.

JOHN M. BROWNING
COLLECTION

Introducing the B15

THE NEXT GREAT BROWNING OVER AND UNDER SHOTGUN

Unveiled in 2015, the B15 Beauchamp is the latest addition to the John M. Browning Collection.

This is the shotgun that Browning aficionados have been waiting for. Ninety years, in fact, since the B25's groundbreaking debut.

Like its companion, the B15 has been exquisitely enhanced by the world-renowned gunsmiths of Fabrique Nationale de Herstal. This ensures balance, reliability, precision engineering and the finest of aesthetic finishes.

The B15 is available in four grades with a choice of exceptional engravings and wood quality. Buttplates and fore-end styles are also included.

At the heart of the B15 is the locking system and technical features shared with the legendary B25, plus new and innovative elements such as performance enhancing mechanical triggers. This blend speaks volumes to those who truly know their shotguns.

The new B15 is the only choice for those who appreciate style, but prize function.

HAND FINISHED B15 IN BELGIUM

B15 BEAUCHAMP GRADE E

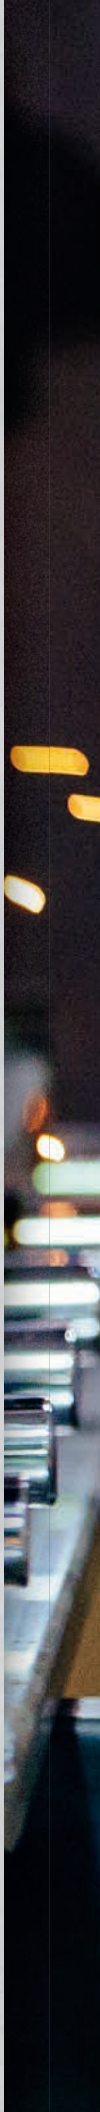

A NAME YOU CAN TRUST.

Many gun safes attempt to secure your firearms and other irreplaceable valuables from unauthorized hands. But what are the contents within the safe, and the memories attached to them, really worth to you and your family?

Browning ProSteel safes, first and foremost, offer complete protection. Our innovative security, fire protection and storage solutions are designed to deter criminals and ward off the ravages of fire. Exceptionally versatile interior configurations allow you to secure more of the things you hold dear.

But it is the lasting value and peace of mind that comes from knowing that your possessions and memories are as secure as you can make them under your own roof. That is what really sets a Browning ProSteel safe apart from every other safe on the market today.

SAFES

MORE SECURE IN EVERY WAY.

Protecting your guns and valuables from theft is one of the driving decisions behind purchasing a safe. Browning has been a leader in the safe industry for decades. The security measures we incorporate are second to none, using smart design, dependable materials, quality construction and hands-on testing procedures to ensure our safes are ultra-tough and able to withstand the onslaught of drill, punch and pry attacks. While many competitors use weaker 14-Gauge steel to keep costs down, the thinnest steel we use is 12-Gauge, which is 40% thicker than 14-Gauge. Heavier 12-Gauge steel is also the minimum required to achieve the coveted UL® RSC (Residential Security Container) certification.

PRY-STOP CORNER BOLTS
Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.

PRY-STOP END BOLTS
Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over two and one-half times longer and attach to a high-strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

PRY-STOP TABS
Pry-Stop Tabs are pieces of angled steel added to the top and bottom bolts and inside of the safe door. These reinforcements work together to increase pry resistance.

OMNIBARRIER® LOCK PROTECTION SYSTEM
A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

DUO-FORMED DOOR
The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 1-11/16" thick.

FORMED DOOR
The Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME
The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

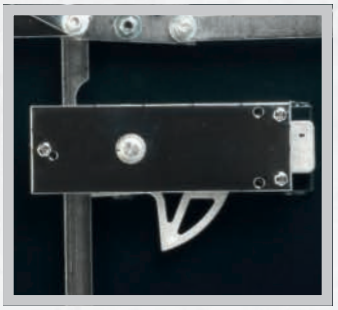

UNI-FORCE™ LOCKING SYSTEM
The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

FORCE DEFLECTOR™ LOCKING SYSTEM
The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

180° HEAVY DUTY HINGES
Rugged exterior hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. Fire protection is better than with internal hinges because no insulation is removed to accommodate the hinges.

PRY-STOP END BOLTS

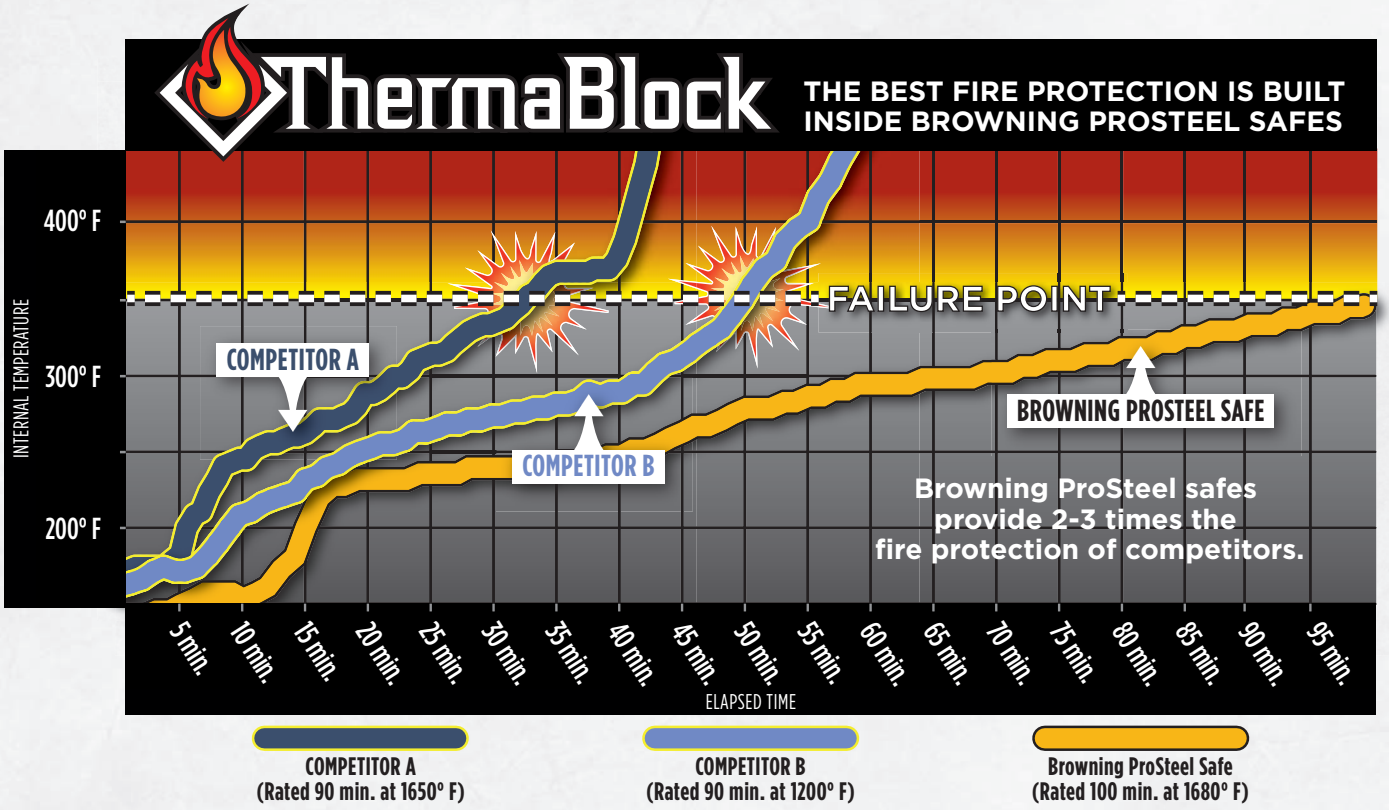

OMNIBARRIER® LOCK PROTECTION SYSTEM

PRY-STOP CORNER BOLTS

UNI-FORCE™ LOCKING SYSTEM

2-3 TIMES MORE PROTECTION FROM FIRE.

ThermaBlock combines external hinges with thicker sheets of fire insulation arranged in an interlocking pattern to eliminate gaps where heat can migrate into a safe and raise the internal temperature. With ThermaBlock, we begin fire testing safes where the other brands' testing ends. The chart below shows that a Browning ProSteel safe with ThermaBlock offers two to three times the fire protection of a comparable safe with internal hinges.

This graph compares a Browning ProSteel safe with ThermaBlock and external hinges to a pair of comparable safes from leading competitors with internal hinges.

Browning ProSteel safe with 1-7/8" thick insulation after 100 minutes at 1680°.

Leading competitor safe with 1-7/8" thick insulation after 90 minutes at 1680°.

EXTERNAL HINGES MATTER.

External hinges offer several advantages over the internal hinges found on other safes, most notably in fire protection. To accommodate an internal hinge, fire protection material must be removed where the hinges attach. In a fire, these two unprotected areas allow the internal temperature of a safe to rise faster, to a significantly higher temperature, than a Browning ProSteel safe with external hinges and no gaps in the fire protection.

OUR EXTERNAL HINGES
External hinges eliminate gaps in the fire insulation to block heat from entering the safe.

COMPETITORS' INTERNAL HINGE
Internal hinges allow up to eight times more heat to radiate inside the safe through gaps in the fire insulation.

THE BEST THERE IS.

Differences among gun safes are difficult to see on a sales floor, but rest assured that you won't find another brand that lives up to the high standards set by Browning. Our safes combine quality construction, proprietary technology and patented interior designs to elevate them above the rest. In addition to groundbreaking features, all Browning ProSteel safes carry the UL RSC (Underwriters Laboratories Residential Security Container) rating — the industry standard that defines a home security safe. The UL RSC rating ensures that a safe meets construction specifications and has passed a series of laboratory test attacks. Confidence in our product is what allows Browning and ProSteel to offer the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, or fire. If one of our safes is involved in one of these situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

BROWNING SAFE WARRANTY LIFETIME PROSTEEL

UNMATCHED CONVENIENCE AND STORAGE SOLUTIONS.

A gun safe is more than total long gun capacity. Handguns, cameras, jewelry, documents, even laptops and external hard drives with thousands of digital memories should have a home inside. Browning ProSteel safes have the most versatile interiors in the industry, bar none.

AXIS

ONE-OF-A-KIND AXIS ADJUSTABLE SHELVING

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. Unlike shelves in the competitions' safes that are either fixed in position or only offer vertical adjustment, Axis shelves can be adjusted up and down, side to side, added and removed to accommodate items over a broad range of sizes. Axis maximizes the interior storage of long guns, handguns and other valuables. Several different shelves and options are available to further customize the interior to meet specific needs. The Axis shelf is made from a single piece of sturdy steel. Shelves are clad in a soft, protective polymer coating that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior. Axis accessories, featured on page 135 are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

CMS

CANTILEVERED MODULAR SHELVING

Creative interior storage solutions don't end with Browning ProSteel Custom Collection models. Cantilevered Modular Shelving borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, Cantilevered Modular shelves can be adjusted up and down, side to side, added and removed to fit a wide range of valuables. The shelves are wood covered in soft carpet and built upon a tough steel frame. Cantilevered Modular Shelving not only demolishes the competitors' offerings in similarly-priced gun safes, this versatile interior outclasses those in models costing thousands more.

UP TO 54% MORE LONG GUN STORAGE.

DPX

THE DPX ADVANTAGE
The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and more to be stored on the back of the safe door. The DPX gun rack creates as much as 54% more long gun capacity inside the safe, and makes the guns on the door easy to access. The Scope Saver increases storage and protects optics. DPX pouches and pockets hold valuables and gear where they are easy to find and free up shelf space for even more items.

CAPACITY COMPARISON	COMPETITOR'S SAFE 25-28 CUBIC FT. SAFE	BROWNING PROSTEEL SAFE 26 CUBIC FT. SAFE	RESULT
TOTAL GUN CAPACITY - HALF SHELF INTERIOR	13 Guns	20 Guns	54% More
TOTAL GUN CAPACITY - ALL GUN INTERIOR	27 Guns	33 Guns	22% More
FAST ACCESS GUNS - HALF SHELF INTERIOR	2 Guns	14 Guns	600% More
FAST ACCESS GUNS - ALL GUN INTERIOR	7 Guns	21 Guns	200% More

HOW DO BROWNING SAFES HOLD 54% MORE GUNS?

- The long gun capacity is a series of three numbers, for example 13/26+7 on a 26 Cu. Ft. safe.
- The first number is the long gun capacity in the safe body with a Half Shelf interior (13 in the example).
- The second number is the long gun capacity in the safe body with an All Gun interior (27 in the example).
- The "plus" number is the long gun capacity on the back of the door (+7 in the example).
- Total capacity grows up to 54% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- "Fast Access Guns" increase in both Half Shelf and All Gun configurations. These guns are defined as those that are on the front row of the safe body and the door gun rack and can be quickly accessed.

* Due to the varying sizes of firearms, actual gun capacity may vary.

THE QUICK ACCESS DPX BARREL RACK
Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

MESH POCKETS
See-through mesh pockets hold smaller items and make valuables fast and easy to visually locate.

DPX HANDGUN POUCHES
The military-style MOLLE system straps on the DPX panel allow handgun pouches and other MOLLE items to be placed virtually anywhere.

DPX SCOPE SAVER
Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

PLATINUM SAFES

SECURITY Heavy duty 3/16" (7-Gauge) steel body • 1-11/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Uni-Force™ Locking System • OmniBarrier® Lock Protection System • Pry-Stop Corner Bolts • 1-1/2" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** ThermaBlock 1750° F/120 min. fire protection **APPEARANCE** Automotive grade gloss finish in your choice of color • Pinstriping and choice of graphic • Five-spoke handle in your choice of finish • Grade VI Cedar paneling interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Steel Shelving with Drawer and Multipurpose Insert, File Box and Pistol Rack • Elevated floor protects gun stocks • Electrical Outlet • Interior Light Package

A

B

C

WHY STEP UP TO A PLATINUM SAFE?

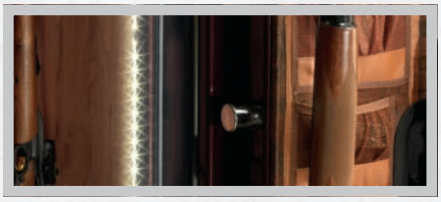

Stepping up to a Platinum model gives you the advantage of an exquisite Grade VI Cedar interior for a unique appearance. Thicker 3/16" (7-Gauge) steel adds additional mass and rigidity, while larger (1-1/2") locking bolts and four corner locking bolts offer greater security and protection. A superior ThermaBlock 1750°/120 minute fire rating keeps valuables protected longer. An Axis Drawer with Multipurpose Insert and File Box are included. Platinum safes are made in the USA.

HIGH CAPACITY BARREL RACK
The High Capacity Barrel Rack stores up to 13 long guns and offers instant access to 7 (per rack).

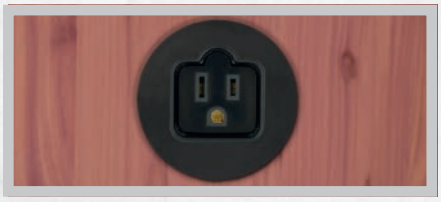

AXIS FILE BOX
Important, sometimes irreplaceable documents can be conveniently stored in the File Box.

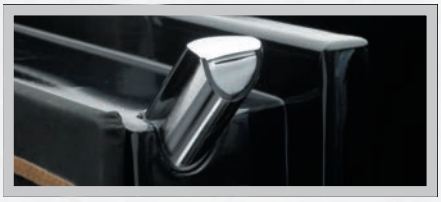

GRADE VI INTERIOR/LED LIGHTING
A fragrant cedar interior adds a rich quality to the safe. Interior LED lighting along the door frame makes locating items inside the safe much easier.

AXIS DRAWER AND MULTIPURPOSE INSERT
The Axis Drawer mounts beneath an Axis steel shelf and includes a Multipurpose Insert that keeps small items organized, easy to locate and protected.

ELECTRICAL OUTLET
The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

PRY-STOP CORNER BOLTS
Innovative long bolts extend diagonally from the corners of the door to protect against pry attack at the vulnerable corner areas.

D

WHY STEP UP TO A MEDALLION SAFE?

Stepping up to a Medallion safe buys extra security with Pry-Stop Corner Bolts, Uni-Force™ Locking System and OmniBarrier® Lock Protection System. Thicker steel (10-Gauge vs. 11-Gauge) means less flex. A higher fire rating (ThermaBlock 1700°/110 min. vs. 1680°/100 min.) is also a benefit. Medallion safes are made in the USA.

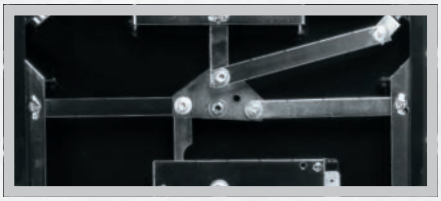

HIGH CAPACITY BARREL RACK
The High Capacity Barrel Rack stores up to 13 long guns and offers instant access to 7 (per rack).

NEW 2017

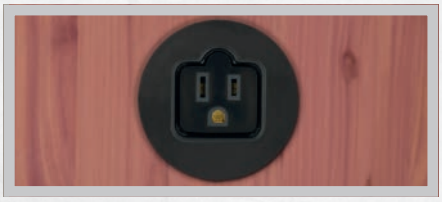

INTERIOR LIGHT PACKAGE
LED lighting adds even more value to the Medallion safe line. A sensor turns on the lights when the door is opened.

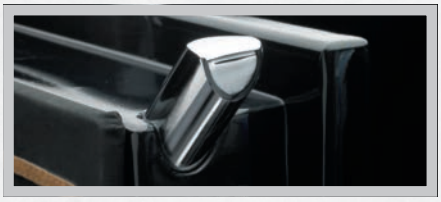

UNI-FORCE LOCKING SYSTEM
Robust cam locks and a multiple diversion bar system divert pressure from reaching the lock.

OMNIBARRIER LOCK PROTECTION
Steel hard plate surrounds the lock and protects it from drill, punch and push attacks.

ELECTRICAL OUTLET
The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

PRY-STOP CORNER BOLTS
Innovative long bolts extend diagonally from the corners of the door to protect against pry attack at the vulnerable corner areas.

EXCLUSIVE, CUSTOMIZABLE, ADJUSTABLE SHELVING.

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) uses an array of shelves that can be configured to meet virtually any need imaginable.

AXIS BOW HANGER
Lock up and protect expensive archery equipment while taking up minimal space.

AXIS SCOPED PISTOL RACK
With a deeper drop and heavy-gauge rods, handguns with optics are easier to store.

AXIS VERTICAL FILE HOLDER
This file holder makes it easier to locate and organize important documents.

AXIS DEEP DRAWER
The Deep Drawer is the perfect home for larger or odd shaped items.

AXIS HIGH CAPACITY BARREL RACK
Make room for more long guns with this high capacity barrel rack.

AXIS PISTOL RACK
With a five handgun capacity, the pistol rack stores the pistols under the shelf, leaving the shelf available for possessions and gear.

AXIS BARREL RACK
With 11 slots for long guns, the barrel rack can be raised or lowered to accommodate rifles, shotguns, carbines and modern sporting rifles.

AXIS STEEL SHELF
The most basic shelf is made from tough steel with a protective polymer skin that protects valuables and handguns.

AXIS DRAWER WITH JEWELRY INSERT
This insert protects and organizes valuables such as watches, rings, bracelets and necklaces.

AXIS DRAWER WITH FOAM INSERT
Isolate your most prized possessions from potential damage. Pick and pluck foam is easily customized to fit nearly any item.

AXIS DRAWER WITH MULTIPURPOSE INSERT
Keep delicate jewelry and other small items organized, protected and easy to find.

AXIS DRAWER WITH MONEY/PASSPORT INSERT
Compartments are sized to organize cash, passports and other documentation.

AXIS DRAWER
The sturdy drawer is perfect for all sorts of goods that need to be separated.

AXIS FILE BOX
Important documents may be irreplaceable or valuable or both. Keep them easy to find in this handy file box.

SECURITY 11-Gauge steel body • 1-1/4" Formed Door with inner plate • Force Deflector™ Locking System • Hardened steel pin lock protection • Pry-Stop End Bolts • 1-1/4" diameter chromed locking bolts on three sides of door (top/sides) **FIRE** ThermaBlock 1680° F/90 min. fire protection **APPEARANCE** Automotive grade gloss black or rugged textured charcoal finish • Pinstriping and decorative scroll work • Three-spoke silver chrome handle • Beige fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Shelving with Pistol Rack included • Elevated floor protects gun stocks

A

MADE IN THE USA

A

B

WHY STEP UP TO A HUNTER SAFE?

Stepping up to a Hunter safe adds a heavy 11-Gauge steel body and larger diameter locking bolts for greater security. A ThermaBlock 1680° F/90 min. rating elevates fire protection. Axis Adjustable Shelving adds convenience. Hunter safes are made in the USA.

THE QUICK ACCESS DPX BARREL RACK
Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

DPX SCOPE SAVER
Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

MESH POCKETS
See-through mesh pockets hold smaller items and make contents fast and easy to visually locate.

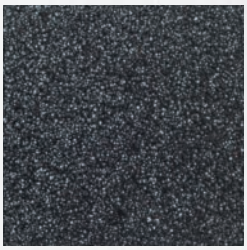

HIGH CAPACITY BARREL RACK
The High Capacity Barrel Rack stores up to 13 long guns and offers instant access to 7 (per rack).

WHY STEP UP TO A HEAVYWEIGHT SAFE?

Stepping up to a Heavyweight safe adds a tough 11-Gauge steel body and Pry-Stop End Bolts for improved break-in protection. The excellent 1550° F/80 min. fire rating offers additional protection. A full DPX door storage rack adds storage for valuables, handguns and long guns, while improving access to more long guns. Black chrome hardware adds a rugged appearance.

QUICK ACCESS RACK
Flexible polymer wings secure the barrel and allow firearms to easily be pushed into or pulled from the rack.

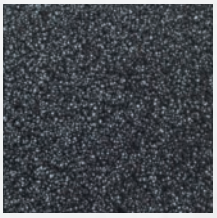

PRY-STOP END BOLTS
More than two and one-half times longer than door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door secure the critical door corners.

CANTILEVERED MODULAR SHELVING
Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

WHY CHOOSE A SPORTER SAFE?

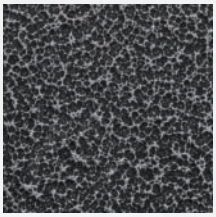

Sporter safes offer the quality, security and fire protection features expected from a Browning ProSteel gun safe at a price that is next to impossible to beat. The 1400° F/60 minute fire protection rating affords additional peace of mind. The Cantilevered Modular Interior and DPX door storage provide the most versatile interior found in any safe at this price — and above.

WHY CHOOSE A SELECT SAFE?

A Select safe offers added security with Pry-Stop End Bolts and a big increase in convenience and capacity thanks to the Quick Access Rack with Scope Saver and full DPX Storage System. The factory-installed LED Interior Light package makes locating items inside the safe easy.

CANTILEVERED MODULAR SHELVING
Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

PRY-STOP END BOLTS
More than two and one-half times longer than standard door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

DUO FORMED DOOR

TOUGH, SAFE-LIKE SECURITY.

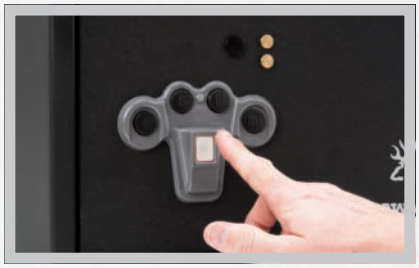

Whether keeping a handgun available for instant protection from bad guys or keeping cash and small valuables secure, trust a Browning ProSteel pistol vault. These feature-packed vaults have sturdy steel walls and include safe-like security measures for superior protection from break in.

PISTOL VAULT FEATURES AND BENEFITS

ELECTRONIC 4-BUTTON TOUCH PAD

Easily program a personal code to offer ready access to handguns and small valuables. Uses eight AA batteries. (Not included.)

BIOMETRIC PAD

Grants instant access with the touch of a fingertip.

LED LIGHTING

Bright LED lighting illuminates the interior, making it easy to locate the pistol vault's contents at night or in a closet.

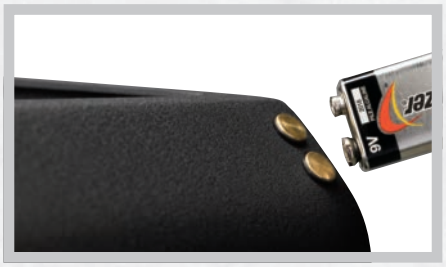

LOCKING BOLTS

A pair of tough 1/2" diameter locking bolts secure the lid.

MANUAL KEY LOCK

Batteries go out? Forget the code? No problem. The pistol vault can still be accessed using the unique four-sided key.

EXTERNAL ELECTRICAL CONTACTS

Should the batteries fail or if the key is lost, pistol vaults include external electrical contacts that power the touch pad. (9V back-up battery not included.)

ON-THE-GO PROTECTION.

Bring the new Pistol Vault Portable with you almost anywhere for compact and solid security. The sleek clamshell design allows for fast access to contents when unlocked. A no-nonsense key lock ensures easy accessibility. The soft interior keeps your contents protected and in place.

NEW 2017

DC LED LIGHT

This battery-powered LED light adds 75 lumens of bright light to your safe interior • Motion sensor activated • Requires 3 AA batteries (not included)

CODE NUMBER	SUGGESTED RETAIL
164154	25.00

NEW 2017

BOLT DOWN HARDWARE KIT

Includes the hardware necessary to secure a gun safe to any wood or concrete floor • Includes four lag screws for anchoring to wood floors and four concrete bolts and concrete anchors for securing to concrete • Wood and concrete drill bits are also included

CODE NUMBER	SUGGESTED RETAIL
164153	15.00

NEW 2017

PISTOL RACK

Store handguns more efficiently • Increases storage space on shelves • Access to handguns is made easier by placing them in an upright position

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	4-Gun	164150	15.00
B	6-Gun	164152	20.00

ZERUST VCI PROTECTANT

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces • Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications • One capsule protects a standard 30" wide safe for one year

CODE NUMBER	SUGGESTED RETAIL
154011	8.00

A

B

C

DPX ACCESSORIES

Take full advantage of the DPX storage system with these accessories • Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two) • Store shorter firearms and make them easily accessible with DPX barrel loops and DPX stock risers

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	Handgun Pouch	164138	31.00
B	Barrel Loop	164155	20.00
C	Stock Riser	164144	23.00

LED SAFE LIGHTING KIT

The LED Safe Lighting Kit is the best aftermarket lighting solution available today • The expandable, linear design places bright, long-lasting LED lighting anywhere in the safe • A motion sensor turns on the lights when the door opens and automatically shuts them off after 30 or 60 seconds with no motion or when the door closes • Each kit comes complete with six LED light tubes with six LEDs per tube, three flexible connectors, mounting clips with hook and loop tape, A/C adaptor and a motion sensor power module

CODE NUMBER	SUGGESTED RETAIL
164112	70.00

VCI GUN SOCK

VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices and drives out moisture where oils cannot reach • Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt • Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet • Drawstring closure • Fits rifles and shotguns 48" to 56"

CODE NUMBER	SUGGESTED RETAIL
149985	14.99

Blue - New and recharged

NEW 2017

COLOR-CHANGING DRY-ZONE MOISTURE REDUCER

Changes color to indicate when its time to recharge • Absorbs moisture without electricity, and is rechargeable in an oven • Can be reactivated indefinitely • One 500-gram bag protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe

CODE NUMBER	SUGGESTED RETAIL
164156	25.00

Pink - Needs to be reactivated

EVERDRY ELECTRIC DEHUMIDIFIER

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust • The 18" long EverDry should be used on safes 30" wide and larger • Cord is removable for installation

CODE NUMBER	SUGGESTED RETAIL
164128	30.00

FLEXIBLE EVERDRY DEHUMIDIFIER

The Flexible EverDry is flat and easily bends • Takes up less space and makes installation easier, especially in small safes • Removes humidity from the interior of a safe and protects against rust • Plug is removable for installation • LED indicates unit is operating

CODE NUMBER	SUGGESTED RETAIL
164129	40.00

MAKING THE CASE FOR PROTECTING EVERY CLASSIC BROWNING.

Keeping a classic Browning in a fitted luggage case is one of the grand traditions of the shooting sports. These cases are constructed with solid wood frames, brass fittings and have the look and feel of fine aged leather. A beautiful fitted case becomes the perfect backdrop for showing off a fine Browning firearm. In addition to providing a place for everything from choke tubes, to shooting gloves, these cases will give decades of tasteful protection for the valuable Browning within.

THAT FINE BROWNING DESERVES SOME EXTRA PROTECTION.

The magnificent finish on a Browning firearm deserves protection from moisture, as well as the everyday bumps and scuffs that are part of moving guns around in a gun safe or on a gun rack. Browning VCI Gun Socks are specially treated to give an extra layer of protection, keeping your favorite rifle or shotgun looking sharp for years to come.

DISCOVER BROWNING'S INTEGRATED SCOPE MOUNT SYSTEM.

Browning's Integrated Scope Mount System unitizes the ring and base into a single, ultra-rigid unit. Machined from 7000 series aluminum alloy, they eliminate alignment problems and the possibility of a loose connection between the base and ring. They are available in .400" Standard height, .500" Intermediate height and .600" High height versions to fit many popular Browning firearms.

T-BOLT

HEIGHT	SCOPE DIAMETER Inches	FINISH	CODE NUMBER	SUGGESTED RETAIL
Standard	1	Matte	12338	69.99

The height is determined by measuring from the top of the base to the bottom of the scope ring. Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

STANDARD HEIGHT (.300")
For scopes with an objective up to 44mm and a standard barrel contour.

INTERMEDIATE HEIGHT (.400")
For scopes with an objective up to 50mm and a standard barrel contour.

HIGH HEIGHT (.500")
For scopes with an objective up to 56mm and a standard barrel contour.

SCOPE BASES

Browning scope bases are machined from solid steel • Double recoil shoulder design holds rings securely, even under magnum recoil • T-Bolt two-piece and SA-22 one-piece bases are alloy and are only compatible with Browning rimfire rings (Code 12365) • These bases are only compatible with Browning scope rings listed at right • Maxus, Gold, Silver, BPS, Buck Mark two-piece bases and BLR Takedown one-piece bases are Weaver-style and not compatible with Browning rings.

BUCK MARK REFLEX SIGHT

Four reticle patterns: Circle-Dot-Cross Reticle, 3 MOA Dot Reticle, Cross-Dot Reticle, Circle-Dot Reticle • Seven-position brightness rheostat • Field-of-view: 15.7m/100m • Unlimited eye relief • Powered by one #2032 lithium battery • Mounts to any standard Weaver-style base • Rugged aluminum housing with matte black finish • Recommended for rimfire use only

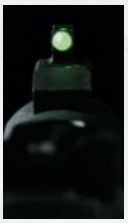

CODE NUMBER	SUGGESTED RETAIL
1290230	69.99

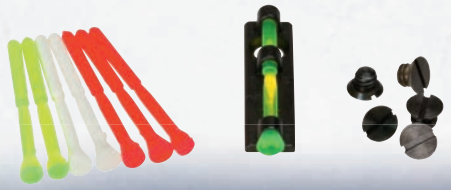

HIVIZ® BUCK MARK PISTOL SIGHT

A great performance upgrade for the Buck Mark Plus, Camper, Standard and Micro pistol models • Speeds target acquisition and provides better low-light accuracy • No batteries required • Easy single screw installation to replace factory front sight • No gunsmithing required • Includes three LitePipes; one green, one red and one white

CODE NUMBER	SUGGESTED RETAIL
12875	44.99

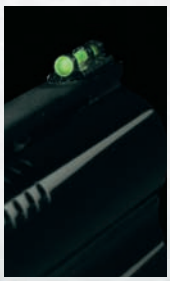

HIVIZ® COMP SIGHT

Metal base threads directly into the bead of shotguns for a more permanent sight picture • Allows the shooter to know exactly where the barrel is in relation to the target • Interchangeable LitePipes allow shooter to match light pipe diameter and color to shooting conditions • Includes two white, three green and three red LitePipes • Used by top professional shooters • Metal base • Five screw sizes, 3/56, 3x.5, 3x.6, 5/40 and 6/48 to fit most shotguns • LitePipe changing key and custom carrying case are included (not shown)

CODE NUMBER	SUGGESTED RETAIL
12850	39.99

HIVIZ® BIRD BUSTER MAGNETIC SHOTGUN SIGHT

HiViz Bird Buster magnetic sights come with four interchangeable LitePipes of different diameters to match different lighting conditions • Includes three sizes of magnetic bases to fit the rib of virtually any shotgun • Mounts easily with no gunsmithing required • Fits all Browning shotguns

CODE NUMBER	SUGGESTED RETAIL
12859	24.99

FINE-TUNE FOR FULL POWER ACCURACY WITH THE BROWNING BOSS.

In the pursuit of extracting maximum accuracy from any rifle, often one must settle for finding a factory load that gives an acceptable level accuracy, or experimenting with custom handloads that give great accuracy, but often at the cost of less than maximum velocity. With the Browning BOSS this expensive and time-consuming process is eliminated. Just pick the right ammo for that important hunt or long-range match and dial up maximum accuracy on the BOSS without sacrificing maximum velocity, greater downrange stopping power and improved bullet stability.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

DON'T CHOKE WHEN SELECTING THE RIGHT CHOKE TUBE.

You know that selecting the right choke tube for a specific hunting situation or challenging target presentation is the key to making a successful shot. This information will help you make the best choice from the wide selection of Browning choke tubes. Our tubes range from Extra-Full constrictions for turkey, coyote and goose hunters to pattern-spreading Timber n' Teal tubes for close-in flooded timber waterfowling. Remember that every Browning choke tube is made to exacting standards to provide you with a perfect, dense and even shot pattern and many years of dependable service.

INVECTOR-DS

INVECTOR-DS CHOKE SYSTEM

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.
- A proprietary differential-banded brass seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 191 and 193.

INVECTOR-Plus™

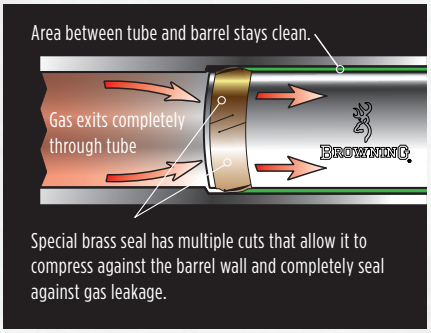

INVECTOR-PLUS CHOKE SYSTEM

- The Invector-Plus interchangeable choke tube system works with Vector Pro and back-boring to offer consistent, dense shot patterns.
- The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors' guns, especially with steel shot.
- Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- See pages 191 through 195 for our complete lineup of choke tubes and choke tube wrenches.

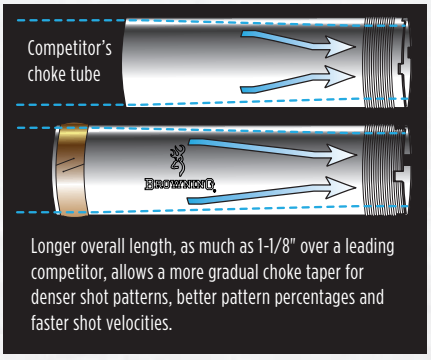

STANDARD INVECTOR™

STANDARD INVECTOR

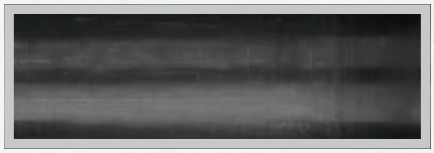

- The Standard Invector interchangeable choke tube system is for Browning's non back-bored barrels and offers consistent, dense shot patterns. It's far more durable than the choke systems found in competitors' guns, especially with steel shot.
- Standard Invector eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel and it's standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 191 through 195 for our complete lineup of choke tubes and choke tube wrenches.

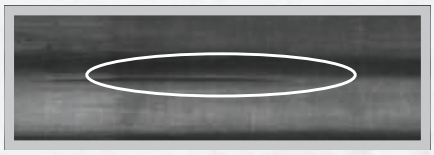

Special brass seal has multiple cuts that allow it to compress against the barrel wall and completely seal against gas leakage.

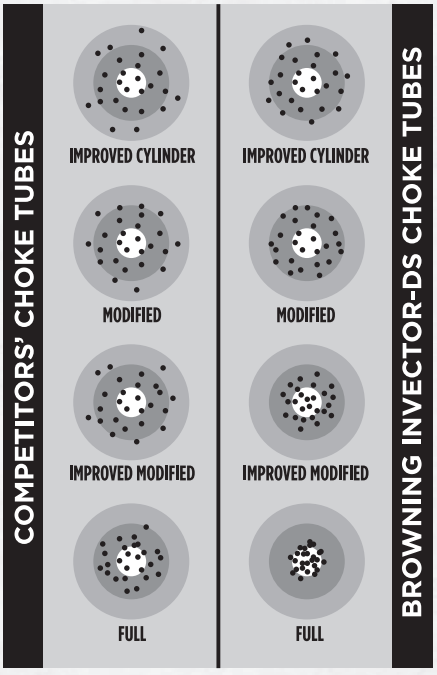

Longer overall length, as much as 1-1/8" over a leading competitor, allows a more gradual choke taper for denser shot patterns, better pattern percentages and faster shot velocities.

Browning's Invector choke tube is still flawless after 500 rounds of steel shot.

The competitor's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-DS EXTENDED CHOKE TUBES

Extended length tubes are easy to change and add approximately 3/4" to the overall length of the barrel • Proprietary differential banded brass gas seal eliminates residue buildup and makes chokes easy to remove and install • Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke • Gas is controlled at the interface between choke and where it seats in the bore • From Skeet to Full choke, patterns tighten consistently and reliably • Choke tube wrenches are listed on page 195 • Flat choke tube wrench is not compatible with Invector-DS choke tubes

BROWNING

THE SHARPEST DESIGNS COME FROM BROWNING.

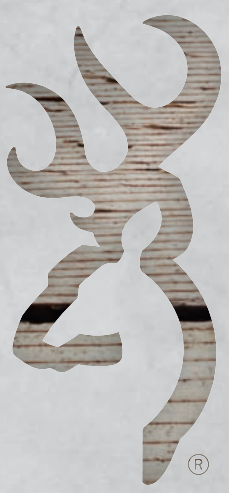

For 2017 Browning elevates top-quality bladesmithing to an art form, creating knives that are among the finest and most unique that we have ever offered. Our new Speed Load knives utilize a variety of razor sharp blade inserts to ensure you'll always have a keen edge that's ready to go. Also new are a full line of Bush Craft knives — tough tools you'll want to bring along to the far side of beyond. If you're an avid hunter you'll want to check out our latest game knives that are proudly made in the USA.

You know that the Browning brand is highly regarded by everyone from the world's most demanding bladesmen to the casual weekend outdoorsman.

Some people will want to own these jewel-like examples for the pure enjoyment of their tasteful design, craftsmanship and quality. Others will want to add them to a growing knife collection. And some need them for their rugged utility as they travel far afield, riding the high range with a genuine Browning knife on their belt.

Wherever you may roam, you'll want a trusted Browning knife along for the ride. You know that they are knives that will be treasured, enjoyed, and in due time, passed along to the next generation. Because you know that Browning's timeless knives are a cut above the rest.

KNIVES

THE FASTEST BLADES ARE IN BROWNING'S SPEED LOAD SERIES.

When it's time to pick up the pace, it's time to put one of Browning's new Speed Load knives in your hand. From the hunting knives and saw to the tactical model, it's the innovative patent-pending quick change blade design, versatile performance and great looks that make Speed Load the must-have blades for 2017.

RUSS KOMMER

The best person to design a serious outdoorsman's knife is someone who uses a knife almost every day in the great outdoors. Russ Kommer draws on decades of personal hunting and guiding experience every time he creates a new knife for Browning. Read more about Russ on page 344.

FIELD DRESSED FOR SUCCESS MEANS A TOP-QUALITY BLADE.

Once the telling shot has been fired and the trophy of a lifetime is on the ground, the real work of the hunt begins. You'll need a rugged knife with the right heft and proper blade shape — one that's made from top grade steel, honed to a razor edge. That's why a Browning hunting knife deserves a place on your belt or in your hunting pack. Its outstanding balance helps transmit every precise cutting movement from your hand to the blade as you field dress game.

JARED WIHONGI

Among the world's foremost law enforcement instructors in edged weapons, Jared Wihongi makes no compromises in his training or his gear. With his experience, Jared is instrumental in the development of every Browning Black Label Tactical Blade we produce. Read more about Jared on page 344.

ABOUT THE NEW JARED WIHONGI SIGNATURE LINE

"My interest in the warrior way of life stems from my Maori heritage, once a Spartan-like society that developed over centuries of inter-tribal warfare in what is now New Zealand.

The spirit of the Maori warrior is expressed in the ritual Haka, a war dance that's intended among other things to challenge and intimidate an enemy. Other conspicuous Maori symbols are stylized tattoos and carvings. These decorations are often added to their weapons to represent a warrior ancestor and thus you carry their strength and courage with you into battle. The Maori designs on the Wihongi Signature line of blades are intended to honor the warrior spirit that lives in each of us.

I have grown up as a martial artist and a student of the Filipino fighting system Pekiti-Tirsia Kali, which specializes in both edged and impact weapons. For the last two decades I've been to almost every corner of the globe, teaching law enforcement, security and military about the function of knives as tools of combat and personal defense. In that time I have learned there are many styles of tactical knives that can work well for the intent of their design. Thus the knives in my Signature Line are an expression of the form and function I prefer in a tactical knife."

— Jared Wihongi

BLACK LABEL BOOT DAGGER

TYPE Fixed double edged dagger **BLADE** Hollow ground satin finish 154CM stainless steel **HANDLE** Full-tang construction • Black G-10 scales **SHEATH** Blade-Tech™ molded polymer with Tek-Lok™ belt clip easily adjusts for carry angle and belt loop width • Made in the USA

DISCOVER EONS OF BEAUTY IN THESE BROWNING KNIVES.

Woolly Mammoths lived in Africa, Europe, Asia and North America for millions of years and became extinct near the end of the last Ice Age. In rare examples the animal's tusks, teeth and bones were covered by sediments, protecting them from decay. Over millennia dissolved minerals replaced these animal tissues to become the fossils from which these unique handles are crafted. These magnificent knives are made in Italy, with the handles made in the USA.

NEW 2017

VISUAL EFFECTS MAMMOTH

HIT ’EM WITH YOUR BEST SHOT.

OUTDOORSMAN ULU HATCHET

TYPE Ulu-style hatchet **BLADE** One-piece head of hollow-ground 4Cr steel • Black oxide finish • Inspired by the traditional Eskimo ulu, the skeletonized curved blade can be used to chop, carve and skin game **HANDLE** Integrated full-tang construction with braided camo paracord wrap **FEATURES** Lanyard eyelet • Nylon sheath included

MODEL	CODE NUMBER	SUGGESTED RETAIL
0045	3220045	34.99

OUTDOORSMAN

Includes tough nylon sheath with snap closure.

OUTDOORSMAN AXE

TYPE Axe **BLADE** One-piece head is hot-forged, hollow ground, high carbon 1055 tool steel **HANDLE** Reinforced polymer **FEATURES** Handle is shaped for easy hand placement when cutting kindling • Sheath included

MODEL	CODE NUMBER	SUGGESTED RETAIL
231	322231	69.99

OUTDOORSMAN

OUTDOORSMAN HATCHET

TYPE Hatchet **BLADE** One-piece full integral head and handle • Hot-forged high carbon 1055C tool steel • Convex ground axe edge • Black tool coating • Laser engraved Buckmark and Browning logo **HANDLE** Finely checkered Zytel® scales **FEATURES** Handle is shaped for easy hand placement for close-in chopping chores • Protective nylon blade guard is included

MODEL	CODE NUMBER	SUGGESTED RETAIL
0197	3220197	59.99

OUTDOORSMAN

Includes tough nylon sheath with snap closure.

OUTDOORSMAN SHEARS

TYPE Shears **BLADE** High carbon tool steel **HANDLES** Tough polypropylene and rubber • Telescopes from 21" to 28" **FEATURES** Lower blade is serrated on one edge • Large guthook • Sheath included

MODEL	CODE NUMBER	SUGGESTED RETAIL
230	322230	54.99

OUTDOORSMAN

KNIFE SHARPENER

TYPE Sharpener **BLADE** Two carbide steel sharpening inserts **HANDLE** Anodized alloy Buckmark **FEATURES** Quickly sharpens most blades • Ideal for pocket, pack, kitchen, cabin or camp • Includes split key ring

MODEL	CODE NUMBER	SUGGESTED RETAIL
0010	3220010	7.99

HOG HUNTER

TYPE Fixed blade **BLADE** 7" hollow ground 440 stainless steel • Laser-engraved Hog Hunter logo **HANDLE** Molded synthetic rubber with checkered surface for improved grip **FEATURES** Includes black nylon sheath (not shown)

MODEL	OVERALL LENGTH	BLADE LENGTH	CODE NUMBER	SUGGESTED RETAIL
865	12	7	322865	49.99

T-Handle Saw comes with a durable nylon belt sheath.

GAME REAPER SAW

TYPE T-handle pelvic saw and guthook **BLADE** 440-C stainless **HANDLE** Contour molded composite • T-shaped handle • Machined grooves for a sure grip with better control **FEATURES** Durable black nylon belt sheath with hook and loop flap closure

MODEL	OVERALL LENGTH	BLADE LENGTH	CODE NUMBER	SUGGESTED RETAIL
926	5-7/8	3-3/4	322926	24.99

CAMP SAW

TYPE Folding camp saw **BLADE** 4116 stainless steel with push/pull saw teeth **HANDLE** Injection molded composite with rubber gripping inlays • Finger grooves and large tail radius for greater comfort and control **FEATURES** Button securely locks the blade in both the open and closed position • Included nylon sheath can be worn in vertical or horizontal position (not shown)

MODEL	BLADE LENGTH	CODE NUMBER	SUGGESTED RETAIL
922	5-1/8	322922	24.99

The polymer belt sheath included with the Shock 'N Awesome has a thumb operated safety bail for secure carry.

BLACK LABEL SHOCK 'N AWESOME

TYPE Tactical tomahawk **BLADE** One-piece full integral head and handle • Hot forged, black powder coated 1055 tool steel • Curved penetration spike **HANDLE** Spiked pommel • Checkered G-10 scales • Lanyard hole **SHEATH** Blade-Tech™ molded polymer with MOLLE compatible attachment system that easily adjusts for carry angle

CROSSFIRE

BRILLIANT IDEAS FROM BROWNING.

The old hunter's adage "You can't hit what you can't see" also applies to any type of outdoor task that takes place in the gloom of night. From changing a flat tire on a lonely roadside to finding that downed buck just as evening closes in — having a reliable light is often the difference between your hunt being a great success or a total failure, or between having a memorable outing or a truly miserable experience.

Make sure that you have reliable, powerful and affordable Browning flashlights and headlamps readily at hand. A Browning light should be part of your everyday carry (EDC) gear and ride-along as standard equipment in your backpack, glove box or purse. And if you carry other portable electronics like a cell phone, GPS or digital camera in the field or on the road, be sure you bring along your USB charging cable and a Browning USB charging station or USB compatible light as a reliable back-up power source.

LIGHTS

HOW TO PICK THE BROWNING LIGHT THAT'S RIGHT FOR YOU.

Browning leads the industry in portable battery-powered lighting for hunters and shooters with more than 40 styles in our product line. Here are some bright ideas on picking the best light for your needs.

SIZE, WEIGHT AND POWER

When choosing a light, smaller, brighter and lighter are better. Today's high-output LEDs are so powerful and efficient they achieve the same light output as the old multi-cell C and D lights. The super bright Alpha Max Flashlights use a single AA battery yet are not much bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are preferred over traditional Xenon bulbs for most uses, thus all our lights are now LED designs. LEDs use batteries more efficiently, illuminate at greater distances, emit a clean, even beam and will never burn out under normal use. Like most technology, LEDs keep getting better every year. For 2017 several of our lights offer upgraded LEDs with 15% - 25% more output.

HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for tasks like dressing a deer, fixing a truck or finding a path through the woods. Modern technology makes many headlamps as powerful as larger hand-held flashlights. The MicroBlast headlamp can be worn either as a headlamp, clipped to a shirt pocket or to the brim of a hat.

LONG RUN TIME

By using advanced digital circuitry, highly efficient LEDs and low-resistance switches, we are able to offer extra long run times on many lights. Most flashlights and headlamps will run for 20-48 hours on the low setting. The High Noon 3C Spotlight will run for 4 days at the low setting. These extended run times could be the difference between getting home safely and spending a night in the woods.

WATERPROOF AND SUBMERSIBLE

Because the great outdoors doesn't always have great weather, we have redesigned most flashlights to be waterproof and submersible to 3 feet for 30 minutes (ANSI IPX7). Most of our other lights are O-ring sealed for greater water resistance (IPX4). The High Noon LED Spotlight is submersible and it floats.

BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as the Blackout 9V, Disrupter, and High Noon Rechargeable Spotlight. Lithium batteries pack twice the power of alkaline batteries for their weight, and operate well at very cold temperatures. Other lights in the line use AA and AAA alkaline batteries because they cost less than lithium and are readily available anywhere in the world. The latest integrated circuit designs in the Browning Alpha Max and Crossfire flashlights allow alkaline batteries to approach the performance of lithium batteries. The latest lithium-ion (li-ion) rechargeable batteries in the Alpha Max and the new USB Charge series offer high energy density with no memory effect and minimal power loss during storage.

SWITCH SETTINGS

Multiple switch settings (high, low and in-between) help preserve battery life and allow selection of colors and flashing options. The lock-out switches found on most of our lights keep the light from accidentally turning on in a pack or pocket. A disorienting Fast Strobe setting is now available on many of our lights, and it has proven useful for self-protection and for signalling during an emergency.

RED, GREEN AND BLUE LEDS

Colored LEDs help preserve night vision and are great for map reading. They are less obvious than white light to many types of game animals.

ANSI FL 1 FLASHLIGHT PERFORMANCE STANDARDS

We proudly participate in the ANSI FL-1 flashlight performance standards for measuring and stating performance claims for all portable lights. This includes Brightness (Lumens), Distance, Run Time, Water Resistance and Impact Resistance. FL 1 provides the only reliable apples-to-apples comparison between models and is used by most major manufacturers. Look for these FL 1 symbols on our light packaging.*

* On lights with multiple settings, the lumens, battery life and distances are stated at the highest setting (100% power), unless otherwise indicated.

LUMENS = BRIGHTNESS

The output of a traditional 2D cell flashlight is approximately 15 - 20 lumens. The latest LED flashlights can have an output of more than 2000 lumens.

BATTERY LIFE

Battery Life (Run Time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

MAXIMUM DISTANCE

Maximum Distance is calculated as the distance from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

WATER RESISTANCE

Water Resistance (FL-1 Standard IPX4) is tested by spraying water onto the light from multiple directions. This simulates a heavy, all-day rain.

WATERPROOF AND SUBMERSIBLE

Waterproof and Submersible (FL-1 Standard IPX7) assures water cannot get inside the light. This test is conducted for 30 minutes at a water depth of 1 meter (about 39").

IMPACT RESISTANCE

Impact Resistance (FL-1 Standard 1M) measures how well the light resists damage when dropped repeatedly from a height of 1 meter (about 39") onto concrete.

IT'S NOT JUST A LIGHT. IT'S THE BROWNING LIGHTING SYSTEM.

Our lights are designed from the ground up to be the most robust and efficient lights on the market. You can choose from a basic flashlight or headlamp and move right up the line to higher-performance lights including those with the latest USB charging capabilities. From small everyday pocket flashlights and headlamps to high-output units capable of throwing a blinding beam for hundreds of yards, Browning is the brilliant brand you should always have in your pocket, pack, purse or pickup.

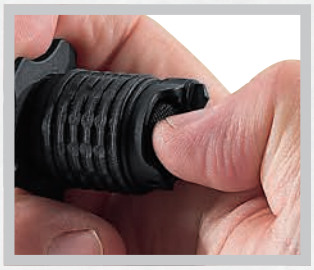

MULTI-MODE OPERATION

- Many of our lights offer a choice of continuous full output, continuous low output and a rapid strobe mode.
- Many models also offer multi-color LEDs for specialized tasks, to extend run times, prevent spooking game animals and preserve night vision.

ALL-WEATHER SEALS ON USB PORTS

- These flexible rubber seals on USB charging ports help keep moisture out of your Browning light or power station to prevent damage during rain and snow or from an unexpected splashing.

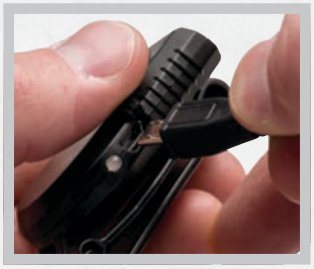

PUSH-BUTTON TAILCAP SWITCHES

- The multi-mode push-button tailcap switches allow partial depression giving you a quick flash for search or identification plus a full depression click to provide a continuous beam for task illumination.
- The textured rubber-covered switch prevents finger slippage during activation.
- The rotating tailcap lock-out prevents accidental activation in a pocket or pack, and a quick twist enables the light.

RUGGED TRAVEL AND STORAGE CASES

- Some of our lights come packaged in rugged polymer cases that provide room for the light and all the necessary power cords, adaptors and other accessories.

USB RECHARGEABLE

- The USB interface has become the modern standard for recharging portable electronic devices. That's why we have a complete line of USB compatible lights and power stations.

MULTIPLE POWER SOURCE CAPABILITY

- Several of our lights utilize the latest generation Lithium Ion (Li-ion) batteries that provide exceptional power density for their size, along with fast recharge times and no memory effect.
- We also have some models that allow battery charging from a standard 110 VAC household wall outlet, a 12 VDC automotive or marine outlet or the USB port on your laptop or home computer. You can even recharge from optional portable solar panels that are becoming popular with wilderness adventurers.
- Interchangeable batteries, either traditional alkaline or rechargeable Li-ion means you can always have extra pre-charged batteries with you and switch them out as needed. If you have other devices that use AA or AAA batteries, like a GPS unit, 2-way radio or a trail camera, you can also use them in your Browning flashlight.

POWER BANK

- The new Browning Power Bank USB Charging Station is built around a 4400 mAh battery that has plenty of juice to keep all your USB lights and other electronic devices topped off and running at peak performance.

BUILT-IN USB CHARGERS

- Several of our USB flashlights are equipped with built-in chargers. You simply plug your light into a USB port, just like you do with your mobile phone or tablet.
- The indicator light monitors your battery status - red for charging, green for fully charged and yellow reminds you it's time to recharge.

FL 1 1-METER WATERPROOF CERTIFICATION

- The majority of our lights are certified to meet the latest international FL 1 Flashlight Performance Standards to operate after being submerged in 1 meter (about 39") of water for 30 minutes. It can be a real lifesaver in a water survival situation.

LET OUR USB RECHARGEABLE LIGHTS AND POWER STATIONS ILLUMINATE YOUR NEXT GREAT OUTDOOR ADVENTURE.

The benefits of the latest USB charge technology are that they provide higher power (both in terms of brightness and longer run time) for the size and weight vs. old-tech throw-away batteries, and you never need to buy new batteries. You'll always head out the door with a fully-charged lighting tool, rather than wondering how much juice is left in your batteries and when you will need to replace them.

NEW 2017

USB charge

EPIC 1AA USB RECHARGEABLE HEADLAMP

LENGTH 3-1/2" **BRIGHTNESS** 100 to 260 lumens depending on battery used **EFFECTIVE DISTANCES** 75 to 115 yards depending on battery used **FEATURES** Rugged Vista camo polymer body • Powerful white LED that never needs replacing • Use the rotary Mode Selector knob to choose between 2 hour mode, 4 hour mode, and 10 hour mode for the white LED, or use the green LED for greater stealth and night vision • Lightweight compact design gives incredible output • Uses one 14500 3.7V 800 mAh lithium ion rechargeable battery or one AA alkaline battery (both are included) • Rechargeable Li-ion battery is rated for 300 charging cycles • Charges in 2 to 3 hours from most AC power sources • USB charging port is protected by a rubber cover • Built-in smart charger with color coded charging indicator • USB charging cable is included • Water-resistant

QUAIL-ITY CONTROL.

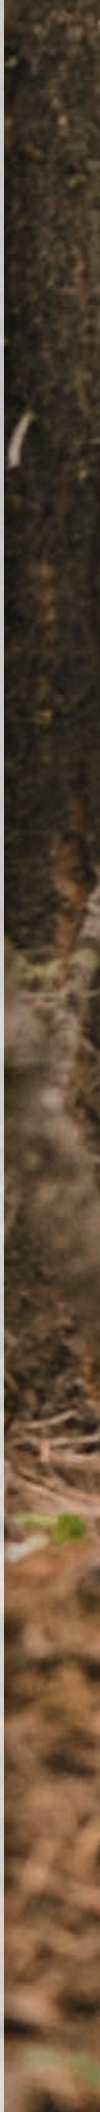

BROWNING APPAREL HAS YOU COVERED IN ALL CONDITIONS.

With the introduction of high-performance Hell's Canyon Speed in 2016, you might think we would take a break; and you would be wrong. For 2017 we pulled the rug out from under Hell's Canyon — our most popular big game clothing line — and completely remade it. Hell's Canyon is now more comfortable, has more features, offers enhanced protection and has even more styles to meet the exact needs your hunting situation requires. It also looks better than ever. Hell's Canyon isn't the only change for 2017. Throughout this section you will find new products that are sure to make your outdoor adventures more memorable.

Whether your passion is chasing elk across the mountains, waiting in a stand for whitetail, laying out for waterfowl or calling "pull" on the range, look no further than the Buckmark on the label to provide the apparel you need with the quality you trust.

APPAREL

BECAUSE WE'RE ALL BUILT A LITTLE BIT DIFFERENTLY, BROWNING CLOTHING IS TAILORED TO FIT YOUR BODY TYPE.

If you put several hunters side by side, you'll instantly see that no two are the same size or shape. That's why we tailor Browning outdoor clothing to fit many different body types. There's HeroFit for the high-activity hunter with a leaner build who ends up climbing over, under and around obstacles during their pursuits. Athletic Fit clothing is designed for those who prefer a trimmer fit but are more moderate in their physical activity when afield. Regular Fit features a more traditional cut and is ideal for those who need additional insulating layers or for those who hunt from treestands or blinds and is ideal for anyone who enjoys a roomy, non-binding fit.

HEROFIT™

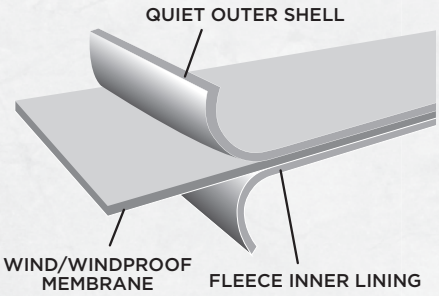

Built for agile hunters. Trim dimensions eliminate extra bulk and weight. Tough, stretchable fabrics maximize mobility.

ATHLETIC FIT

Comfortably fits a wider range of hunters with a trimmer, slightly tailored fit that reduces bulk, bunching and weight.

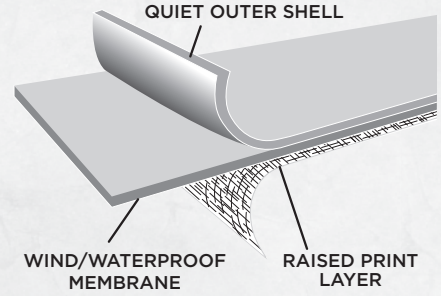

REGULAR FIT

Traditional, full cut design that offers maximum freedom of movement and fits the widest range of hunters.

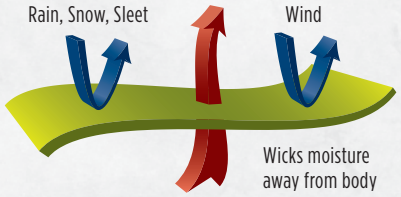

3-LAYER FABRIC TECHNOLOGY

- Many of Browning's clothing products feature our unique 3-Layer fabric. Once you experience the comfort and quiet of this fabrication for yourself, everything else is just something less.
- The outer layer is a quiet soft shell that reduces snagging on branches and brush to help minimize game spooking noise. This fabric creates a soft drape that looks good and feels great in all conditions.
- Bonded to the outer layer is a membrane layer that is breathable yet remains windproof and highly water resistant.
- An embossed tricot lining adds warmth without undue bulk.

2.5-LAYER FABRIC TECHNOLOGY

- Browning features 2.5-Layer fabric technology on Hell's Canyon Hammer rain wear. This highly functional fabric offers high breathability paired with excellent waterproofness. It also packs down small for easy storage.
- The outer shell is a quiet brushed layer that reduces snagging on branches to minimize noise. The fabric creates a soft drape that wears well and functions great in foul weather.
- Bonded to the outer layer is a Pre-Vent membrane that is breathable yet remains waterproof and windproof.
- The 0.5 layer is a raised print layer that creates a minimal barrier between you and the membrane, while allowing maximum breathability.

PRE-VENT
WATERPROOF • WINDPROOF • BREATHABLE

A SUPERIOR WATERPROOF, WINDPROOF & BREATHABLE MEMBRANE.

- Pre-Vent is our waterproof, windproof, breathable membrane.
- Pre-Vent keeps out rain, snow and wind while breathing away perspiration to keep you warmer and drier.

PRIMALOFT®

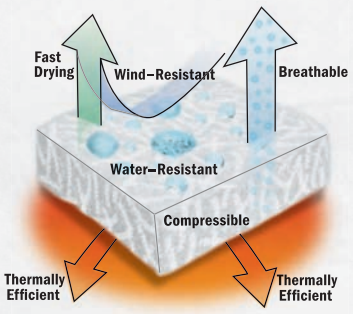

PRIMALOFT® IS WARM — WET OR DRY.

- PrimaLoft is a premium performance insulation that is engineered for superior warmth, water resistance, loft and compressibility.
- PrimaLoft has the best warmth to weight ratio in the industry. The fibers are more densely packed and retain heat better than other insulations for improved thermal efficiency.
- Water-resistant PrimaLoft fibers are permanently treated to repel water and prevent absorption, making PrimaLoft faster drying than other synthetic insulations.
- The fine fiber, high-loft insulation keeps you warmer, in extreme conditions, even if it gets wet.
- PrimaLoft is the choice of the U.S. Military. Over 1,000,000 PrimaLoft military garments are deployed in active service around the world.

HARNESS ACCESS

HARNESS ACCESS

- Select Browning outerwear offers convenient Harness Access.
- Allows a treestand safety harness to be comfortably worn underneath a parka or jacket.
- Improves concealment as the harness no longer interferes with the camouflage pattern on the garment.

WindKILL™

KILL CHILL WITH WINDKILL.

- Our windproof, breathable WindKill fabric is 100% windproof, highly breathable and water resistant.
- A lightweight barrier, WindKill prevents chilling winds from penetrating the fabric to keep you warm.

ADDVANCED SCENT CONTROL™

ADDVANCED SCENT CONTROL IS AN IMPROVED ADDVANTAGE AGAINST HUMAN ODOR.

- Outwitting the keen noses of easily spooked game in order to close in on a perfect shot is a challenge every hunter faces. ADDVANCED SCENT CONTROL is the next generation of odor management technology and again changes this critical aspect of hunting to put the odds in your favor.
- Attacks bacteria that causes human odors.
- Captures and degrades human scent before it escapes into the environment.
- Lasts for the life of the garment.

SILENTSNAPS

- For decades outdoor clothing has used traditional metal snaps and hook and loop fastener to secure things like pocket flaps, zipper flaps and collars. These types of fasteners freeze, are cold, noisy and just plain hard to use with chilled, wet or gloved fingers.
- Browning's new SilentSnaps use a quiet polymer interface that won't spook game, yet are easy to use in any condition.

RUGGED SLIDER BUTTONS

- These large, low profile buttons are easy to fasten and undo, even in cold, wet conditions.
- Unlike buttons that are simply sewn on, the Slider Button is held in place by a durable loop of webbing that laces through two slots and is then securely sewn right into the seam. This military style button is more secure.
- These durable buttons won't come off in the laundry or in the field.

A-TACS CAMO® AND THE SCIENCE OF CONCEALMENT.

A-TACS Camo® patterns are created utilizing a totally new, patent pending approach to maximize concealment. It starts with a collection of colors taken straight from the outdoors and photographed in carefully controlled lighting.

A mathematical algorithm takes the colors and writes "organically-shaped" pixels using the specific color information. The resulting pattern, while still digital, is far more organic in appearance than other digital patterns because A-TACS replaces the unnatural angled pixels with organic pixels. The organic pixels are then digitally modified to create real world elements without subscribing to the traditional "limb and leaf" mimicking patterns. The end results are patterns that eliminate the human outline from as close as a few feet and minimizing the "blobbing" effect when viewed from a distance.

Just as nature varies, A-TACS doesn't take a "one-pattern-fits-all" approach. A-TACS camouflage patterns were created to perform in climatic zones containing either arid or timber climates. The arid pattern (AU) is mostly brown with small samplings of green. For temperate, forested climates where green colors dominate, Foliage/Green (FG) is the best choice. These patterns are different not only in color but also in their design. In other words, they are not the same pattern in two different colors, because to do so would minimize their effectiveness.

We are confident that once you wear A-TACS patterns in the field, you will be a believer in their effectiveness and performance in getting you closer to whatever game you are pursuing.

Put A-TACS Camo and Hell's Canyon Speed to the test.

We are pleased to have A-TACS Camo® as the proprietary camouflage used on Hell's Canyon Speed gear.

WICKED WING™

PREPARE FOR WICKED HUNTING CONDITIONS.

Wicked Wing waterfowl clothing is constructed to keep you out in the weather and hunting in comfort regardless of the conditions. Browning professionals have spent countless hours testing and re-testing Wicked Wing products and the evidence shows with fit and features that only real-world experience can produce. From the layout blind — to the marsh — to the swamp — be prepared to stay warm, dry and ready to hunt with Wicked Wing.

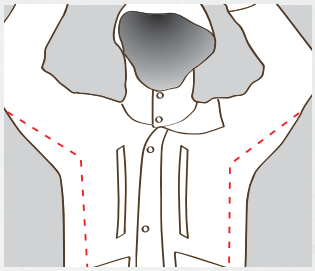

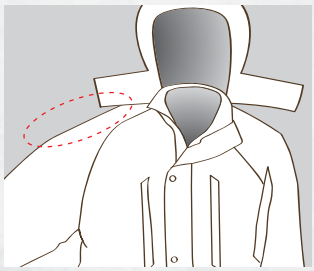

ANGLE-ENTRY POCKETS

- Angle-Entry pockets are designed around the interaction between the arm and hand, and the pocket.
- When the hands are above the elbows they naturally point up, and when the hands are below the elbows they point down.
- To align with natural hand angles, the interiors of the chest accessory Angle-Entry pockets and the shell pockets are slanted down while the two handwarmer Angle-Entry pockets slant up.

ARROW GUSSETS

- The Arrow Gusset armpit design has a smooth, tapering shape as it rises along the side to under the sleeve.
- Offers a better fit, enhanced range of movement and no binding.

RAGLAN SLEEVES

- Raglan sleeves are cut at a long tapering angle right up to the collar line.
- The top of the sleeve becomes one seamless piece of fabric all along the shoulder with no exposed seams to leak, even in the worst downpours.

WICKED WING 4-IN-1 PARKA

SHELL

- Pre-Vent waterproof, breathable fabric shell
- Two upper Angle-Entry handwarmer pockets, two zippered chest Angle-Entry accessory pockets, two lower bellows Angle-Entry pockets with magnetic closures, inside security pocket
- Raglan sleeve eliminates top shoulder seam
- Arrow Gusset armpit and articulated elbow
- Detachable, adjustable hood
- External and internal storm flaps
- Adjustable, watertight laminated cuffs
- Molded shoulder strips prevent wear
- Internal waist drawcord
- Mesh moisture barrier strip between shell and lining
- X-Change System compatible
- License tab

LINER

- Camo fleece reverses to solid-color woven fabric
- PrimaLoft® Synergy insulation
- Elasticized bottom and cuffs
- Two slash pockets on each side

WICKED CLOTHING FOR DARK TIMBER.

Wicked Wing Timber is geared for hunting in the awesome backdrop of flooded timber. Jacket styles are shorter to keep the gear in your pockets above the waterline. Soft shells and fleeces include Under The Wader Technology (UTW) with breathable fleece on the lower body to keep you from overheating under your waders. Water-resistant upper body fabrics and splash panels protect from water when setting decoys and splashing through the muck.

WICKED WING TIMBER WADER JACKET

- Pre-Vent waterproof, breathable fabric shell
- Shorter wader length with elastic drawcord waist
- Two upper Angle-Entry handwarmer pockets, two lower bellows Angle-Entry pockets with magnetic closures, inside security pocket
- Raglan sleeve eliminates top shoulder seam
- Arrow Gusset armpit design and articulated elbow
- Detachable, adjustable hood
- External and internal storm flaps
- Adjustable, watertight laminated cuffs
- Molded shoulder strips prevent wear on shoulder areas
- Mesh moisture barrier strip between shell and lining
- License tab

MORE COMFORT, GREATER LOAD CAPACITY.

Mile after mile carrying water, lunch, ammunition and maybe a couple of birds is a real burden with a traditional upland hunting vest. Browning Bird'n Lite gear is a backpack built into an upland hunting vest. Like a backpack, the integrated load-bearing system evenly distributes weight between the shoulders and hips, and stabilizes the load to reduce fatigue and increase comfort.

BIRD'N LITE VEST

- Weight distribution system secures the load
- Rugged cotton/polyester shell fabric
- Blaze shoulder overlays
- Front-loading bloodproof game bag with zip-top opening and load stabilizing strap
- Oversized shell pockets with internal shell loops and snap closures
- Built-in rucksack
- Zipper front
- Transmitter pocket with antenna loop
- REACTAR G2 pad pockets behind each quilted shoulder patch (pad sold separately)
- Lined handwarmer pockets
- Water bottle pockets
- D-rings for accessories
- Available with or without Pheasants Forever embroidery
- License tab
- Regular Fit

REGULAR FIT Bird'n Lite®

- Wide nylon shoulder straps transfer the load to the shoulders, yet still allows you to swing through the bird naturally.
- Quick-release sternum strap helps keep the weight centered between your shoulders for improved balance and less fatigue.
- Fully-adjustable load bearing straps place the load's center of gravity where it's most comfortable to carry.
- Ergonomically-contoured, padded adjustable waist belt offers added support to your lower back and allows part of the load to be carried on your hips for greater comfort.
- Quick-release composite buckle allows for quick on and off.

ATHLETIC FIT

STAY COOL WHEN THE HUNTING HEATS UP.

Hunting in the heat and humidity of late summer and early fall can be brutal. When doves are plentiful and shade is scarce at the water hole, stay hydrated and wear a lightweight Browning vest to stay cool.

From world-class shooters to the hardest of the hardcore hunters to unique personalities, the members of the Browning Pro Staff all share a love of the outdoors, the shooting sports and the greatest gun brand in the world. Pro Staff members are chosen for their skill, professionalism and enthusiasm in promoting the Browning brand. Look for these faces at major shooting events and on your television screen.

CHRIS DENHAM, NATE SIMMONS AND RYAN HATFIELD

Chris Denham, Nate Simmons and Ryan Hatfield are the hosts of *Western Hunter TV*, a program committed to teaching and entertaining viewers hunting in the vast expanse of the American West.

Chris brings notable credentials to the program. He is the publisher of *Western Hunter Magazine* and has spent the better part of 30 years in the hunting industry. As a passionate hunter and guide, he possesses a great deal of knowledge about the region and its game animals. One of his most important endeavors is the group Outdoor Experience 4 All, which helps children with terminal or life-limiting illnesses get into the field on a hunting trip of their own.

Nate Simmons is an accomplished outdoor writer and the producer and co-host of *The Western Hunter TV*. As a bowhunter, Nate is known to take extreme to a new level with his hardworking, do-it-yourself style.

Ryan Hatfield has a storied career in the outdoor industry as an author, penning articles for magazines and books alike. Originally from Idaho, Ryan grew up hunting in rugged mountains. He brings his expertise and experience to your TV screen as co-host of *The Western Hunter*.

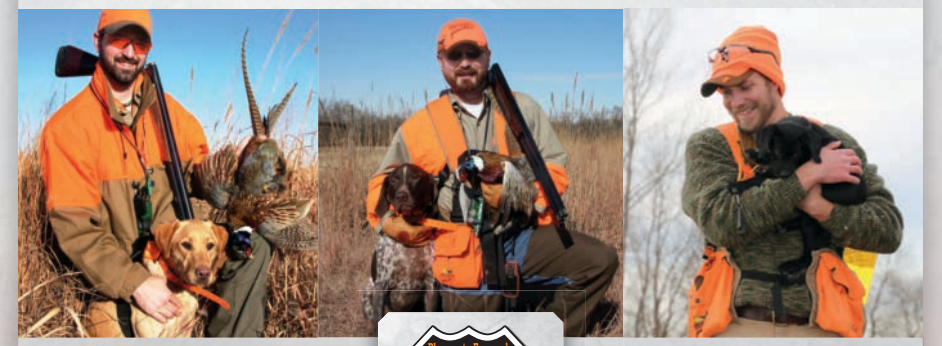

TOM MIRANDA

When it comes to trapping and bowhunting, few can rival the experience and expertise of Tom Miranda. Tom felt the pull of the outdoors at an early age, and became interested in trapping as a teenager. His interest would soon lead to a new career in front of (and behind) a camera. In 1986, he began producing videos detailing trapping techniques. His on-air presence and success soon had him hosting other programs on major cable TV networks.

In addition to trapping, Tom is an accomplished bowhunter, which you can see for yourself on his latest programs, *Adventure Bowhunter with Tom Miranda* and *Territories Wild with Tom Miranda*.

ANDREW VAVRA, BOB ST. PIERRE AND ANTHONY HAUCK

Andrew Vavra, Bob St. Pierre and Anthony Hauck are the hosts of Pheasant Forever's *Rooster Road Trip*, an exciting online program that takes hunters road tripping across the country, hunting exclusively on public land, in pursuit of America's most popular upland game bird.

But their dedication to hunting and conservation goes well beyond the entertainment industry. Andrew is a published writer, accomplished blogger and serves as the Marketing Manager for Pheasants Forever. Bob is also a well-known blogger and spends his non-hunting hours as the Director of Marketing and Public Relations at Pheasants Forever and Quail Forever. Anthony also works at Pheasants Forever as the Director of Public Relations.

Go to pheasantsforever.org to view episodes of *Rooster Road Trip*. While there, join Pheasants Forever and help ensure the future of the pheasant and its habitat.

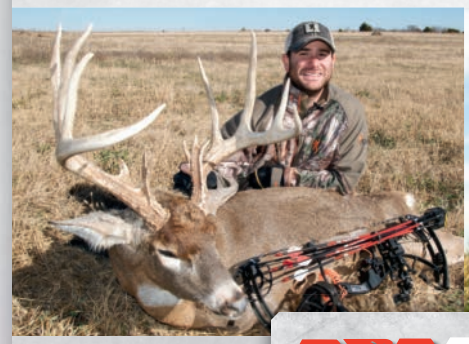

CHAD GLAUSER

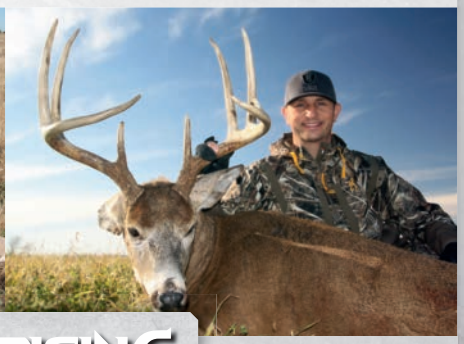

In his younger days, Utah native Chad Glauser spent his time in the backcountry in search of monster deer. Hunting eventually became a big enough passion that, in 2008, he and his wife packed up and moved north to Alaska.

Now Chad spends his time in the field hunting as host of *Alaska Outdoors TV* airing on the Outdoor Channel. Here he brings viewers along on his adventures, showcasing the bounty and beauty of the Last Frontier.

JASON BOWERS AND ERIC HALES

RED RISING

Grab your buddies and head outdoors in search of whitetails with the boys from *Red Rising*. Jason Bowers and Eric Hales are Virginia natives who had the fortune of spending their early years in the outdoors chasing whitetail deer.

Red Rising follows the exploits of Jason and Eric as they move from hunt to hunt, sharing with viewers the thrill, and sometimes the disappointment, they experience on their hunting adventures.

Unlike many shows, you won't find far-flung trips to exotic lands. Instead, *Red Rising* focuses on the most important aspects of hunting: Time with family, camaraderie and enjoying the hunt as much as a successful result.

JASON MATZINGER

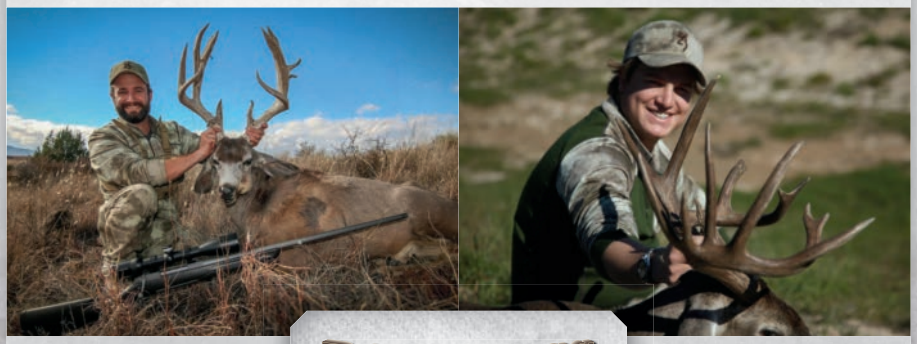

INTO | HIGH COUNTRY

Travel *Into High Country* with TV host Jason Matzinger as he travels across the Western United States on big game hunting adventures. As a Montana native, hunting in big mountains comes naturally to Jason. He grew up hunting and eventually guiding other hunters.

Featuring stunning imagery and useful tips and tricks to help hunters be more successful, *Into High Country* offers viewers an in-depth glimpse into the Western hunting experience.

WILLIAM AND McLEAN RUSSELL

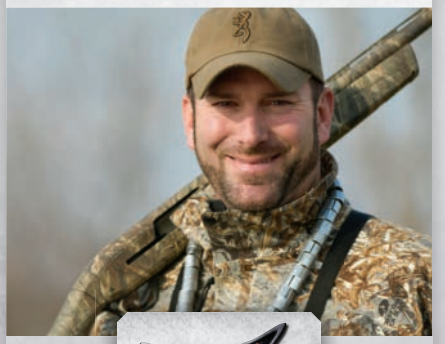

William and McLean Russell grew up on the family ranches in Texas and have had a gun in their hands since they could walk. Taking full advantage of the wealth of hunting and shooting possibilities offered in their home state, the brothers have put their passion for the outdoors into *Boundless Hunting TV*.

This exciting show takes the Russell brothers across the globe in search of life-changing hunting adventures. While they may be brothers, the pair are quite different. William prefers to take extreme hunting to the next level with his knowledge of tracking and survival techniques, and McLean uses his interests in photography, cooking and game management to bring a unique twist to the program.

What really sets *Boundless Hunting* apart from other hunting shows is its message of family and the bonds created by being outdoors. *Boundless Hunting* airs on huntchannel.tv, carbontv.com and youtube.

FRED ZINK

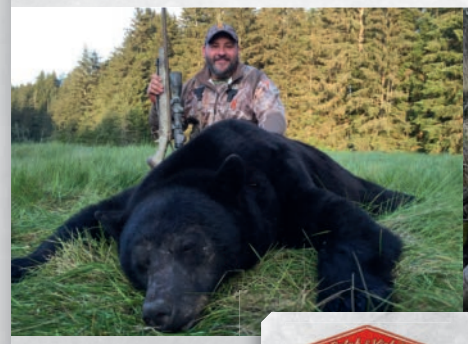

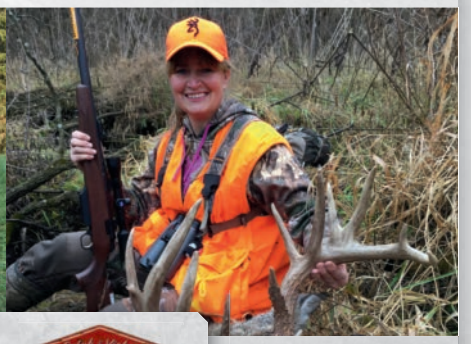

As host of the popular TV series, *Avian-X*, Fred Zink shares the excitement of waterfowling as he embarks on hunts throughout the U.S. and Canada. Along the way he shares the secrets of his highly successful calling tactics and strategies.

Fred founded Zink Calls™ in 2001 as a way to put exceptional calls into the hands of waterfowlers and professionals who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the industry.

Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares his hunting experiences with his viewers.

RALPH AND VICKIE CIANCIARULO

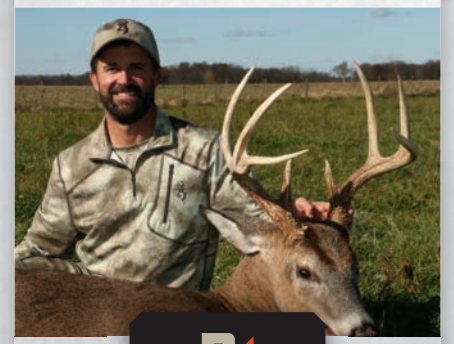

Ralph and Vicki Cianciarulo have spent the past 30 years educating and entertaining bow and rifle hunters as outfitters, video producers and TV personalities. This award winning pair has travelled around the globe in search of hunting adventures.

Originally hailing from Chicago, IL, Ralph grew up with a bow in his hands. He eventually opened Archer's Choice, an archery pro shop. It was here the pair met when Vicki, who had caught the outdoor bug herself, strolled through the front door looking for her first bow and the rest is history.

Browning is honored to be the clothing sponsor of *The Choice*, and to put products to the test in the hands of one of the biggest power couples in the hunting industry.

WILLI SCHMIDT

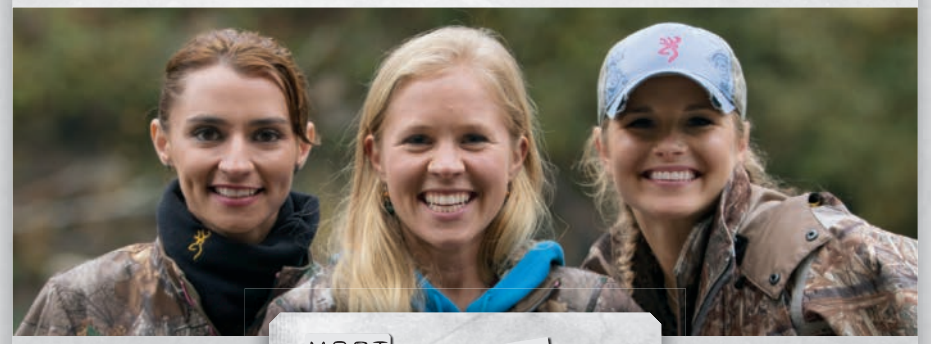

Once mired in the corporate world, Willi Schmidt took the leap and decided to pursue his passion for the outdoors as a host on outdoor TV. This new pursuit led him on the path to showcase the way he loved to hunt, with the challenge of succeeding and failing on his own.

As the host of *Pure Hunting*, Willi takes you on his Do-it-Yourself adventures and shows that pure hunting opportunities still exist for those willing to put in the effort. *Pure Hunting* explores the training, nutrition and gear that goes into the preparation of a self-sustained hunt. Willi appreciates the journey leading up to the hunt, not just the result and he enjoys the friendships made and camaraderie experienced along the way.

JESSI JO STANFILL, JESS HULL AND KRISTY LEE COOK

MOST WANTED LIST

Girls will be girls — and hunting and being outdoors shouldn't change that. Country music singer Kristy Lee Cook is a long-time member of the Browning Pro Staff and her program, *Most Wanted List*, is her latest endeavor.

Kristy brought her amazing voice to the TV screen on the 7th season of *American Idol®*. Now Kristy is a rising country music singer and possesses an infectious passion for everything she does, whether it is singing, hunting or working actively with her sister's foundation, Heavenly Hope Ministries.

Most Wanted List takes the bucket list concept up a notch and focuses on Kristy and her friends Jess Hull and Jessi Jo Stanfill as they embark on a series of adventures. These three ladies take to the road and travel across the country on an epic adventure full of dream hunts, friendship, challenges and the satisfaction of achieving their lifelong goals.

BOB REDFERN

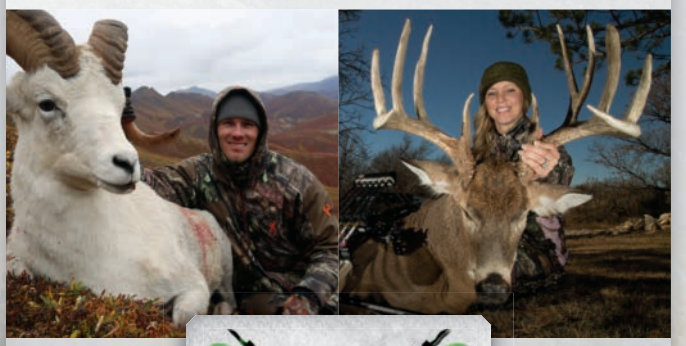

Bob Redfern's Outdoor Magazine

Bob Redfern's experience as an outdoor TV personality extends back more than 35 years. With his lifelong devotion to promoting hunting, shooting sports, fishing, and conservation efforts, Bob ventured out on his own in 2001 to begin the highly successful outdoor series, *Bob Redfern's Outdoor Magazine*.

Bob enjoys bringing the outdoors and the best it has to offer to the screen each week, featuring real life hunting and fishing adventures with featured segments on how to succeed at hunting, shooting, and fishing as well as the award-winning *Sportsman's Table* weekly cooking segment. Each week Bob features hunting and fishing destinations around the country for the sportsman who seeks the best places to enjoy the outdoors year round.

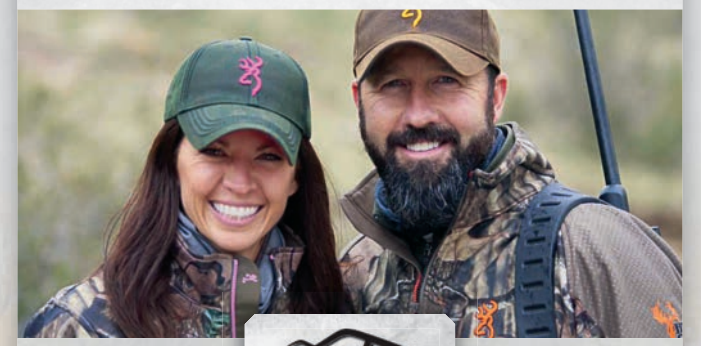

LEVI AND SAMANTHA MORGAN

Born in North Carolina, Levi Morgan began competing and hunting with a bow when he was six years old. Since then, he has amassed an impressive list of archery results, including eight World Championships and 40 National Championships. Now you can follow along with Levi, and wife Samantha, on *Name the Game TV.*

Name the Game TV brings you along as Levi and Samantha divide their time between harvesting trophies in archery competition and chasing game in the field. On air, their love and knowledge of the sport and the surroundings helps to immerse viewers in each episode.

RICK AND JULIE KREUTER

Husband and wife hunting duo Rick and Julie Kreuter host *Beyond the Hunt.* This unique program follows this dynamic pair on more than just their hunting adventures, it also focuses on wildlife conservation and land management.

Rick grew up in the outdoors of Wyoming and adventure has been a part of his life from an early age. After graduating from college, Rick received his guide license and soon became an outfitter full time.

Julie has also had a love of the outdoors from her earliest days in Nebraska. She and Rick were married after she received her degree in Physical Therapy.

As their outfitter business grew, so did their success and popularity, and after 16 years of guiding hunters, *Beyond the Hunt* is their own adventure.

FOSTER AND MATT BARTHOLOW

Foster and Matt are stars on the ATA trapshooting circuit, and both shoot Browning Citori shotguns. The brothers came up through the Scholastic Clay Target Program and have made their mark within the pro ranks. Matt has earned several Grand American Championship titles, holds the 2nd longest recorded singles run at 1840, achieved his Grand Slam (and Grand American Grand Slam), owns several South Dakota State Champion titles and is a three time All-American Team member.

Foster is also a Grand American Champion and set a shoot off record at the Grand with 200 targets in program and 900 in shoot off. He is a two time All-American Team member, achieved his Grand Slam (and Grand American Grand Slam) shooting 200 singles, 100 doubles and 100 handicap from the 27 yard line. He too holds multiple South Dakota State Champion titles.

Both Matt and Foster will tell you that the Citori shotgun is a workhorse that just keeps on shooting, round after round, year after year.

ROBBIE PURSER

Robbie started shooting skeet at the age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit.

JOHNNY MEITZEN

Johnny Meitzen has been a Browning Pro Staffer for years and was recently honored when he was inducted into the Texas Sporting Clays Hall of Fame.

Johnny started shooting competitively in 1987 and has shot over 100,000 competitive matches, winning a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. He is an NSCA Level III instructor and a die-hard Citori man who currently shoots a Citori 725 Sporting.

ALEX WAMPLER

Californian Alex Wampler began shooting sporting clays in 2004 and by 2007 had earned her way onto the All-American Team. In addition to winning the 2013 US Open Lady FITASC Championship, she has been National Lady Sub Gauge HOA champion, regional champion and California Ladies Champion each on several occasions.

Her shooting interests also go beyond the range. She is a guide at Birds Landing Hunting Preserve, an NRA Range Safety Officer and attends the University of California Davis with aspirations to become a veterinarian.

TOMMY THACKER

With a nickname like "Tommy Gun," you had better be fast on the trigger — especially if you are competing on the 3-Gun Nation tour.

Tommy Thacker is ranked among the best 3-Gun competitors in the nation, amassing an impressive list of victories and top finishes that includes winning the 3-Gun Nation Pro Series Championship in 2011 and 2012. With his success, Tommy has his pick of autoloading shotguns — he chooses to get it done with his Browning A5.

SHILOAH MATTOON

Born in the small town of Kamiah, Idaho, Shiloah Mattoon fondly recalls that firearms have always been a part of his life. His competitive shooting career began in 2011, and his early experiences ignited Shiloah's passion for 3-Gun competition. Now he competes against the best shooters in the 3-Gun Nation tour.

In addition to having a full-time job, Shiloah spends hours practicing and takes an athletic approach to the sport, training daily in the gym.

Shiloah shoots a Browning A5 with absolute faith in its unwavering reliability and Speed Load Plus feature.

TENNILLE CHIDESTER

Hailing from Salt Lake City, Utah, Tennille Chidester began shooting competitively in the USPSA ranks in her mid teens. Now she has found her true passion as a competitor in the 3-Gun Nation Pro Series, with her reliable Browning A5 speeding her through the shotgun events. You may also recognize Tennille as the winner of the fourth season, and now host, of *Ammo and Attitude*.

In addition to the fast-paced competition, it is the amazing people and camaraderie that draws Tennille to the exciting sport of 3-Gun shooting. She especially enjoys introducing others to the sport and encouraging their development.

GREG JORDAN

What began in 2007 as shooting in a few local USPSA matches has become a full-fledged career for Greg Jordan.

Like many shooters, Greg caught the bug and his new hobby soon turned into a passion. Two short years later he earned the title of USPSA Grand Master and found a new interest, 3-Gun competition.

Greg's hard work and commitment to practice, training and equipment continues to pay off. In 2014 he became 3-Gun Nation Champion with his Browning A5.

JARED WIHONGI

Originally from New Zealand, home of the legendary Maori warriors, Jared Wihongi has more than 25 years of martial arts experience and is trained in the Filipino blade-fighting system of Pekiti-Tirsia Kali.

As a sought after instructor, Jared has worked with the U.S. Army Special Forces Groups, the DEA, Philippine National Police Academy, Special Action Force commandos, Marine Force Recon and Germany's GSG-9 to name a few.

Jared works closely with Russ Kommer on the development of every Browning Black Label Tactical knife to make sure they are up to our demands and meet the real world needs of discerning users like you.

RUSS KOMMER

Russ Kommer is the man responsible for most of our lineup of world-class knives.

Russ grew up in the north woods of Minnesota, hunting, fishing, trapping and logging. His career as a guide took him to Idaho in search of big game in the formidable Selway-Bitterroot Mountains and eventually led him to guide hunters in the wilds of Alaska.

Having to dress big game as a hunting guide, Russ learned the meaning of the word quality, and how important it is in a knife. His experiences quickly taught him what he needed in his knives and, when he couldn't find what he wanted, started making his own knives to meet his demanding needs.

Now a world renowned name in the knife industry, Russ spends much of his time on his ranch in North Dakota developing new designs.

TAKE THE HIGH GROUND.

As much an emblem of the outdoor lifestyle as it is of the Browning brand, the Buckmark is the most recognizable symbol in the firearm industry. Whether on your vehicle, worn on T-shirts, caps, or permanently inked on your body, the Buckmark is a statement about your lifestyle. We have partnered with the companies on the following pages to represent the Browning brand with quality products and to share our commitment to the outdoor industry.

AIRGUNS

High-performance designs like the 800 Series pistols, replica Buck Mark, and the under-lever cocking Leverage Air Rifle are cornerstones of this versatile lineup of top-quality airguns for Browning fans of all ages.

RACK UP SOME POINTS.

BROWNING IS COMMITTED TO SERVING YOU

Every effort has been made to ensure that all product photographs, descriptions and specifications in this catalog are accurate; however, inadvertent errors may occur. Changes in design or materials due to our continual effort to improve products may result in specification changes before subsequent publications are issued. Browning reserves the right to modify or change specifications without notice.

BE A SAFE SHOOTER

Read and follow all safety information in the owner's manual provided with each firearm before use. Additional copies are available for free download on the Browning website. Browning endeavors to make the safest firearms possible; however, firearm safety begins with you. At all times treat any firearm with intense respect for its power and potential danger. Always point the muzzle in a safe direction. There is no excuse for careless or abusive handling of any firearm.
